Wiseguyreports.Com Adds "Venison -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2025" To Its Research Database

Venison, the meat from any kind of deer. Venison resembles beef and mutton in texture, colour, and other general characteristics. It has virtually the same chemical composition as beef but is less fatty. Lean venison roast, before cooking, contains by weight approximately 75 percent water, 20 percent protein, and 2 percent fat; this protein content is about the same as that of a lean beef rump.

United State is the largest consumption area, taking account of 23.69% global market share, where consumers show increasingly interest on the venison. Europe holds 15.43%. With the nutritional value of venison gradually be emphasized in China, we estimated that China, which currently has % of the global venison market share, maybe expand its consumption market share in the following year.
