

# StrikeForce Announces its PrivacyLok Beta Program

*PrivacyLok Is The Industry's Only Solution Designed To Protect Your Camera, Microphone, Keyboard, Audio Speakers & Clipboard During a Video Conference*

EDISON, NEW JERSEY, USA, October 14, 2020 /EINPresswire.com/ -- StrikeForce Technologies, Inc. (OTC PINK: SFOR),

announces that its [PrivacyLok](#) beta program should launch within the next month or so.

"Our new PrivacyLok privacy protection software is another game changer from StrikeForce," says Mark L. Kay, CEO of StrikeForce. "PrivacyLok will protect your Windows desktop computer from spyware that's designed to steal confidential & corporate data. PrivacyLok protects your keyboard (with our new anti-hooking technology), it will protect your camera, microphone, audio-speakers, clipboard and prevent unwanted screenshots. PrivacyLok will protect your private data when you are on a video conference, as well as when you are not. We designed PrivacyLok to protect confidential data regardless of which video conferencing service your using (i.e. Zoom, Webex, LogMeIn, MS Teams, BlueJeans and all others)."

"This is how a company like StrikeForce becomes a house-hold name", says Kay, "it was just a month ago that we announced the beta program for our [SafeVchat](#) secure video conferencing solution, now a month later we are introducing the beta program for our PrivacyLok privacy protection software, and we are confident in our belief that our new PrivacyLok software will be the industry's most advanced privacy protection software commercially available and will work best with SafeVchat."

"We designed PrivacyLok for a global audience," says Kay. "Consumers, corporations & Government agencies all need our software. Hackers have a global reach and they are gunning for all of us, if you have a Windows computer, hackers have a target on your back. They have an abundance of tricks to choose from to exploit your computer and steal personal, corporate, & financial data. PrivacyLok was designed to lock-down things like your camera, microphone & audio speakers, because hackers are now targeting the increased usage of video conferencing due to the Covid-19 pandemic."

“Protecting data is at an all-time high, you shouldn’t be up all night worrying about your next data or privacy breach, leave that job to us. Your privacy is your business, protecting it is ours”, says Kay.

For more information, or, to sign-up for our PrivacyLok and/or SafeVchat beta programs please visit us at: [www.safevchat.com](http://www.safevchat.com) or, [www.strikeforcetech.com/privacylok](http://www.strikeforcetech.com/privacylok).
