

Renown Author On Cyber Security Partners with Catalyst Connection and FBI To Preserve Manufacturing Contracts in Region

PITTSBURGH, PA, USA, October 14, 2020 /EINPresswire.com/ -- PITTSBURGH, PA, October 14, 2020 — Leia Shilobod, CEO of InTech Solutions, has joined forces with the regional Manufacturing Extension Partnership, Catalyst Connection, and the FBI, to show Pittsburgh region manufacturers how they are at risk of losing certain contracts – and how to save them.

“Manufacturers have struggled with understanding and implementing the compliance controls in NIST SP 800-171, now CMMC,” said Shilobod, “but now the government is serious about compliance and manufacturers will lose their contracts if they are not compliant.”

The three organizations are presenting a 6-part webinar series entitled, “Cybersecurity Resiliency for Defense Contractors” to give manufacturers the clear path to attain compliance, be ready for government assessment of cybersecurity, and not only keep contracts – but be competitive to attain even more. Hundreds of jobs across the Pittsburgh region are at stake.

Speakers for the webinar series include Leia Shilobod, Author of Cyberwarfare and CEO of InTech Solutions, Connie Palucka, Vice President of Catalyst Connection, and Dale Carlson of the FBI.

LEIA SHILOBOD is the CEO of InTech Solutions, a fast-growing IT services firm based in Greensburg, PA and bestselling author of Cyber Warfare: Protecting Your Business From Total Annihilation.

As a cyber security advisor, Leia speaks frequently at venues and events such as Harvard Club of Boston, Pennsylvania State Department events, and Accounting and Manufacturing industry events.

Also known as the “IT Princess of Power,” Leia saves small and mid-market firms from hackers and keeps them compliant by delivering enterprise-class IT security solutions.
