DNS Made Easy and Constellix Announce New PoP in South Africa

Successful PoP deployment for DNS Made Easy and Constellix now offers the fastest speeds and highest quality traffic-management solution.

RESTON, VIRGINIA, USA, October 15, 2020 /EINPresswire.com/ -- DNS Made Easy and Constellix, the industry leaders of global DNS services with a guaranteed 100% uptime, announced live traffic is now running over their network (AS16552) in South Africa, at the TERACO data facility. This successful deployment of a new PoP in South Africa adds 20 Gbps of peering and even more transit connectivity to provide the highest quality traffic-management solution for that region of the world.

DNS Made Easy and Constellix Announce New PoP in South Africa

" A unique part of our service is that we own our full network from routers to switches to bare metal nameservers. The extra logistics to achieve this during COVID-19 is significant."

Steven Job, President of DNS Made Easy and Constellix.

• New PoP deployed in South Africa at the TERACO data facility, with live traffic running over new network
• This successful deployment now offers the fastest speeds and highest quality traffic-management solution in that region of the world.
• With this PoP addition, DNS Made Easy and Constellix has surpassed 3,000 different networks, providing more peering points than competitors
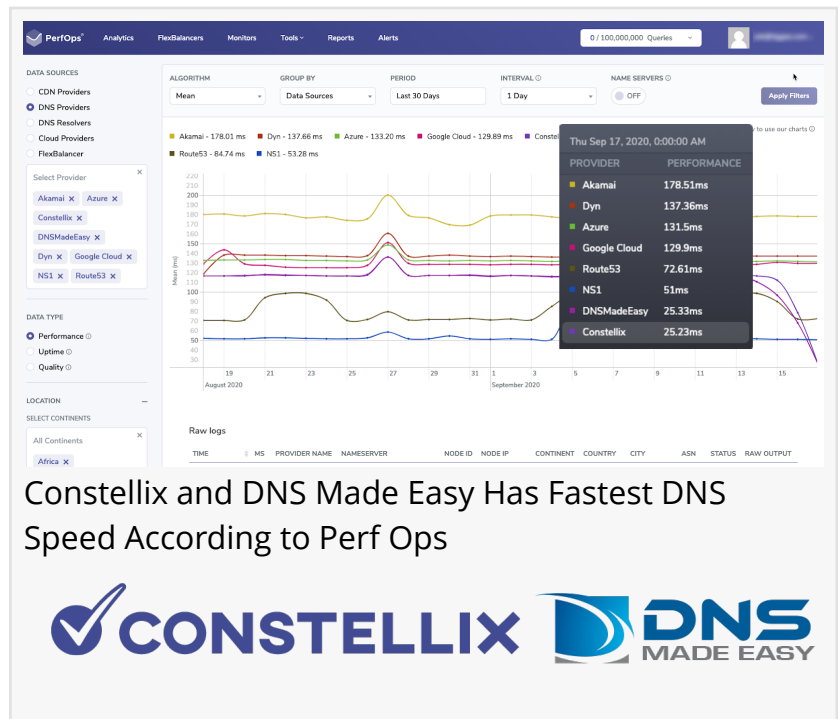

"Expanding into South Africa has been requested by our customers and partners that require faster speeds and better traffic decisions. A unique part of our service is that we own our full network from routers to switches to bare metal nameservers. The extra logistics to achieve this during COVID-19 is significant. To be leading the industry in uptime is something that we have always valued for the last 19 years. Now, with our recent global expansion in South America and Africa, we are continuing our commitment to offer the fastest possible traffic decisions as well. I am truly proud of our team here at Tiggee and our relationship that we have

with our vendors and partners," says Steven Job, President of DNS Made Easy and Constellix.

With this new PoP addition, DNS Made Easy and Constellix have also announced that they have surpassed 3,000 different networks that AS16552 is peered with. By adding more peering, this allows networks to exchange traffic with DNS Made Easy and Constellix services in a cost-effective and efficient way. This also increases speeds and resilience of the services provided by Tiggee. According to numerous third-party services such as [Hurricane Electric BGP reports](#), DNS Made Easy and Constellix offer the most redundant and well-connected network that is dedicated to authoritative DNS in the world.

Constellix and DNS Made Easy Has Fastest DNS Speed According to Perf Ops

According to PerfOps, DNS Made Easy and Constellix are clear frontrunners outperforming their competitors' speeds in Africa. The figure above shows speeds of 25.33 for DNS Made Easy and 25.23 ms for Constellix. South Africa is one more region of the world where DNS Made Easy and Constellix are now #1 in speeds, redundancy, features, and price.

ABOUT DNS MADE EASY
DNS Made Easy (DNSMadeEasy.com) is a subsidiary of Tiggee LLC and a world leader in providing global IP Anycast enterprise DNS services. DNS Made Easy implemented the industry's first triple independent Anycast cloud architecture for maximum DNS speed and DNS redundancy. Originally launched in 2002, DNS Made Easy's services have grown to manage hundreds of thousands of customer domains, receiving more than 80 billion queries per day. Today, DNS Made Easy builds on a proud history of uptime and is the preferred DNS hosting choice for most major brands, especially companies that compare price and performance of enterprise IP Anycast alternatives. DNS Made Easy is located at: 1490 Commerce Park Drive Suite 140, Reston, Virginia 20191 USA

ABOUT CONSTELLIX
Constellix (Constellix.com) is a subsidiary of Tiggee LLC, the creators of DNS Made Easy, and the world leader in providing global IP Anycast enterprise DNS services. Constellix is the only traffic-management solution built for the cloud that combines DNS management with monitoring solutions. Constellix DNS is the most powerful and precise DNS query-management platform, fully integrated with the Sonar monitoring platform. Users can quickly change routing configurations based on the analysis from Sonar alerts. Constellix Sonar has integrated tools

that offer a range of advanced monitoring features including performance optimization, troubleshooting, real-time logging, and alert management built for teams. Constellix is located at: 1490 Commerce Park Drive Suite 140, Reston, Virginia 20191 USA
