

# GENE TOX LAB SOLUTIONS ANNOUNCES CHARLES CLARK AS NEW COO

*Gene Tox Lab Solutions excited about new possibilities with new COO*

SAN DIEGO, CALIFORNIA, UNITED STATES, October 14, 2020 /EINPresswire.com/ -- [Gene Tox Lab Solutions](#), Inc. announced today that Charles Clark was selected by the founding partners and the executive board to assume the role of Chief Operations Officer, effective immediately.

“Clarks’ appointment is an exciting milestone in a plan that the founding partners and the executive board has been working for some time”, says Catherine Rells, Chief Executive Officer, co-founder and managing partner. “Charles is a seasoned, servant leader, experienced in technology and software development, operations, strategic planning, and in portfolio project management of small to large-scale organizations. He is adept at critically analyzing client needs to implement the appropriate systems for the organization.”

New Perspective, Established Experience

During his 20+ years of technology experience, Charles has served in various roles as: CAD/CAM Designer, Software Developer, Software Development Manager, and Director/Sr. Director of Program Management Organizations, managing program portfolios ranging from 24mil to 1 billion dollars in annual revenue. He has worked for fortune 100 information management companies such as: AT&T Bell Laboratories, Motorola; European Aeronautics Defense and Space Company (EADS), and Johnson Controls. Charles’s depth of knowledge in various technology

Solutions

industries ranging from Telephony, Public Safety, Retail, Healthcare, and Biometrics is well known globally.

## About the Company

Gene Tox Lab Solutions, Inc. provides solutions for healthcare organizations by incorporating specialized lab testing, genomics, informatics, and education to help both small and large healthcare organizations, clinics and hospitals improve their patient outcomes, lower costs, and increase revenue.

Charles Clark, COO stated "Gene Tox Lab Solutions is dedicated to making a difference in healthcare by connecting providers with resources that will assist in the patient care continuum, as well as providing data analytics to help manage patient population groups. Our mission is to manage the programs we implement with partners that are focused in the areas of genomics lab testing, and data analytics to better manage the health of the patient population, for both small and large healthcare organizations, clinics and hospitals. We are very excited about the opportunities we have to make a difference in healthcare."

Healthcare isn't just expensive; it's wasteful. It's estimated that half of all medical expenditures are due to repeat procedures, expenses associated with traditional methods of sharing information, delays in care, errors in care or delivery, and the like. With an electronic and connected system in place (informatics), much of that waste can be curbed. From lab results that reach their destination sooner, improving care delivery to reduced malpractice claims, reducing errors with health informatics reduces errors, increases communication, and drives efficiency.

Health care is undergoing a massive renovation thanks to technology. Gene Tox Lab Solutions, Inc. and Charles Clark, COO is helping to ensure that part of the change results in greater efficiency, coordination, and improved care.
