

SugarDaddyMeet Identifies Preferences For Online Payments Among Top Age Groups

LOS ANGELES, CALIFORNIA, US, October 15, 2020 /EINPresswire.com/ -- [SugarDaddyMeet](https://www.sugardaddymeet.com), a revolutionary online platform for genuine connection, companionship, and romance, has changed the world with its newly integrated community. After conducting a recent survey of its members, SugarDaddyMeet is excited to release compiled findings that show which members, by age group, are most likely to prefer online payments.

Providing the perfect online atmosphere, SugarDaddyMeet surveyed its community of over 3.5 million users from the top 20 richest countries around the world. A platform that has helped millions connect in real-time maintains an active community across age brackets, which are best divided into 18-24, 25-34, 35-44, and 45+ age ranges. Online payment preferences correlate strongly with age due to a variety of factors, which often include consumer preferences, consumer trust, security, privacy, and hidden fee concerns in the online economy. Each proves a fundamental factor in the online payment experience, and each SugarDaddyMeet user weighs these factors differently with a different degree of consideration while transacting online.

The survey had interesting results and found that community users aged 45 years of age or older preferred to pay online in the United States, United Kingdom, Australia, and Canada. However, users in the 35-44, 25-34, and 18-24 age brackets were least likely to pay online from the same countries, respectively. These results paint a picture of SugarDaddyMeet users, and who other users may meet, share, and connect with on the platform.
