

Missouri US Navy Veterans Lung Cancer Advocate Recommends the Lawyers at Karst von Oiste to Assist a Navy Veteran with Lung Cancer in Missouri with Compensation-It Might Exceed \$100,000 if They Had Asbestos Exposure

SAINT LOUIS , MISSOURI , USA,
December 4, 2020 /EINPresswire.com/
-- The Missouri US Navy Veterans Lung Cancer Advocate says, "If your husband or dad is a Navy Veteran who has lung cancer and he had significant exposure to asbestos in the navy in the 1960s or 1970s please call the lawyers at the law firm of Karst von Oiste to discuss compensation anytime at 800-714-0303. Financial compensation for a person like this might exceed \$100,000 and the claim does not involve suing the navy. The typical person we are trying to identify is over 60 years old and they probably are not aware the \$30 billion dollar-asbestos trust funds were set up for them too-as the lawyers at Karst von Oiste are always happy to discuss."

The US Navy Veterans Lung Cancer Advocate is now offering to assist a Navy Veteran who now

has lung cancer and who had significant exposure to asbestos in the navy to get possible VA Benefits for their illness. The Advocate will assist with a Navy Veteran with lung cancer with their initial VA claims submission-and there is no charge for this service. For more information, a Navy Veteran with lung cancer-who also had heavy exposure to asbestos in the navy prior to 1982 or their family are welcome to call the Advocate anytime at 800-714-0303.

The Missouri US Navy Veterans Lung Cancer Advocate's free services are available to people with asbestos exposure lung cancer or mesothelioma in Kansas City, St. Louis, Independence, Columbia, Lee's Summit, O'Fallon, St. Joseph or anywhere in Missouri. <https://Missouri.USNavyLungCancer.Com>

High-risk work groups for exposure to asbestos in Missouri include Veterans of the US Navy, civilian workers at Whiteman Air Force base, power plant workers, factory workers, public utility workers, plumbers, welders, industrial workers, electricians, auto mechanics, machinists, and construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's.
