

The greatest mysteries of all times

Deceptions between science and science fiction

CALIFORNIA CITY, CA, US, October 22, 2020

/EINPresswire.com/ -- The latest book by Pierre A. Kandorfer portrays some of the greatest mysteries of all times. Where did we come from? What is the origin of life? How and when was our universe created?

Charles [Darwin's evolution](#) theory claims that our universe created itself "out of nothing." According to most school books, life was created from dirt, water, and a lot of time through the so-called "primordial soup" around four billion years ago. Secularists want us to believe that everything in our universe is material. Is there any scientific proof of that? Over one century since the introduction of the evolution theory, not a single aspect of the claim has been independently confirmed. Still, our school kids are being spoon-fed with the evolution theory, while the Biblical [creationism](#) is outlawed in our education system. At the same time, Darwin's critics face censorship in our public life.

Pierre A. Kandorfer's latest book

The supposedly "scientifically provable" evolution, the big bang, and scientific rationalism theories remain twisted. These deceitful theories are defying common sense, logic, and any reliable, methodical proof every honest scientific undertaking relies upon. What is left?

“

I say what I mean - and I mean what I say.”

Pierre A. Kandorfer
