

ALERCELL ANNOUNCES THE OPENING OF A SUBSIDIARY IN MILAN ITALY

BOZEMAN, MONTANA, UNITED STATES, October 26, 2020 /EINPresswire.com/ -- Alercell, Inc. a Biotechnology company specialized in delivering innovative in vitro rapid diagnostic tests, accurate and efficient, to tackle infectious diseases, today announced it is establishing a presence in Milan, Italy.

“This is a significant step in Alercell’s evolution,” said Frederic Scheer, Chairman and CEO of Alercell. “The development of this presence in Italy reflects Alercell's continued commitment to providing a viable medical solution to meet soaring demand in the European market. After exploring possible sites in several countries in Europe, we identified Italy, where we have already in place a network of relationship. In addition,

the Italian government has expressed its strong support for the development and use of antibody serology tests, therefore it was the obvious location choice for our presence.”

Our plans include the incorporation of Alercell Italia SpA within weeks with head office in Milan.

“

This is a significant step in Alercell’s evolution,”

Frederic Scheer

The office will primarily a sales office, but we anticipate very quickly a large storage facility outside of Milan. We are already exploring a few locations.
