Report Summary:

Aircraft Cargo System is a system for designing aircraft for the special transport of goods. The growth in e-commerce has stimulated air cargo growth, which in turn is generating demand for freighter aircraft. For safe transfer of goods and cargo in freighter aircraft, the need for advanced cargo systems has increased significantly. With the introduction of the newer generation of widebody passenger aircraft with larger lower-hold capacity, most of the airlines are using their passenger aircraft for transportation of cargo to capitalize on additional revenue opportunities. This is generating a need for installation of cargo systems in passenger aircraft, which is boosting the growth of the market during the forecast period.
