

Gatun Technologies Now Offering Free IT Consultation to Businesses in Houston

One of Houston's best IT companies is now offering consultations to businesses in Houston at no cost.

HOUSTON, TEXAS, UNITED STATES,
October 28, 2020 /EINPresswire.com/ --
Representatives with [Gatun](#)

[Technologies](#) today announced that it is now offering free IT consultations to businesses in Houston.

"We're in this business to help cultivate and advance other small businesses," said Robert Moore, CEO and spokesperson for Gatun Technologies, a company that has been recognized by Expertise.com as Best Managed IT Service Provider in Houston. "It's as simple as that. Driven by the philosophy that if we help local businesses solve their IT issues so they can become more profitable and successful, then we will naturally grow along with them. There is no catch; no fine print just earned experience and best practices that we've fine-tuned over the years to make our services work for your business needs.

Moore said Gatun Technologies has provided exceptional professional IT Support for businesses since 2015. The company's No. 1 goal is to give its clients Enterprise-level services and solutions at prices that work for small businesses.

As for the [free consultation](#) for businesses in Houston, Moore explained that his company will give businesses a free consultation which will show business owners that there is a better way to combat those day-to-day issues that run down businesses everywhere of all sizes.

"We can discuss your specific concerns and run a full audit of your network infrastructure. This will map out any weak points and uncover issues before they even occur," Moore said before adding, "That's the Gatun Technologies Difference; proactive maintenance to prevent downtime. We don't wait around for things to break so we can charge you more for time spent; we strive to keep your business up and running all day, every day. Why wait to experience a loss in productivity or get slammed with high computer repair bills? We want you to expand and grow while staying within budget. I urge you to take advantage of our service, and I trust you'll see that I'm right; we're the best at what we do, and our level of service is top-notch."

As to how customers rate the company's services, Ken, CEO of Liberty Capital, highly recommends them.

"Gatun technologies came in and fixed our technology and connectivity issues," he said. "They now completely manage all the IT for my business. I have saved so much money outsourcing my IT to a company that handles it all. Instead of paying an IT tech from one company - then another company for the other services and get another company for something else. I tried another IT company before them, and there were always some hidden fees. With Gatun, I really appreciate their flat-rate fees. And they always give me honest advice. I highly recommend them, and I'll be sticking with them."
