# Sombudha Adhikari Discusses the Growth of Software as a Service (SaaS) and its Impact

Software as a Service (SaaS) Has Grown Quickly During the Last Few Years and Sombudha Adhikari Is Here to Discuss This Novel Platform

WHITEHOUSE STATION, NJ, UNITED STATES, November 4, 2020 /EINPresswire.com/ -- During the past few years, technology has changed just about every business function. One of the major developments that has taken place during the past few years has been the growth of Software as a Service, also known as SaaS. This is an area of expertise of Sombudha Adhikari, who is a specialist in this field and is here to discuss the impact that SaaS is having on numerous parts of the business world.

Sombudha Adhikari Defines Software as a Service and its Scope
First, it is important for everyone to listen to Sombudha Adhikari as SaaS is defined. This is an alternative to the way that software is usually installed on computers. Sombudha Adhikari remembers that days that software was installed on computers in the form of a disc or even a file that was downloaded from the internet. A user has to build the server and then install the application that is used to configure it. With the SaaS model, the user does not pay for the software itself. It is instead treated as a rental. There are a few benefits of this model that everyone should note.

Sombudha Adhikari Discusses the Benefits of SaaS
There are a number of benefits that everyone will enjoy with a system such as SaaS. One of the biggest benefits that people such as Sombudha Adhikari have noted is that there is a reduced time to benefit. The software is already installed and configured as soon as someone signs up for SaaS. Therefore, the user has the advantage of using a server that is set up in the cloud. In just a couple of hours, the application is ready to go. Another major benefit that Sombudha Adhikari is that the cost is less. SaaS uses a system where people share the software program. As a result, the hardware and software costs are low when compared to the traditional model of using the software. Furthermore, the maintenance costs are low as well, as everyone who uses the SaaS program divides the maintenance costs of that solution.

Sombudha Adhikari Discusses the Future of Software as a Service
In the business world, SaaS is still relatively new. As a result, this program still has a lot of untapped [potential. Sombudha Adhikari](#) is leading the way, helping everyone learn more about this system and finding new ways to apply it. One thing that is certain is that the scalability and integration abilities of SaaS are unmatched. In this manner, most people in the industry believe that SaaS is only going to continue to grow in the future. It will be interesting to see what happens next.
