

Aleddra Expands the Industries 1st Self-Testing/Self-Diagnosis T8 and T5 Emergency Lamps

Aleddra Gen4 EM T8 tube is now available in both 2-ft and 4-ft and the Gen4 EM T5 tube is available in 4-ft.

RENTON, WASHINGTON, UNITED STATES, November 5, 2020

/EINPresswire.com/ -- The Seattle-based lighting technology company, Aleddra, is pleased to announce the expansion of its Self-Testing/Self-Diagnosis EMERGENCY Tube Family. The Gen4 EM T8 tube is now available in both 2-ft and 4-ft and the Gen4 EM T5 tube is available in 4-ft.

Since its introduction a few months ago, Aleddra's 4-ft Gen4 T8 self-testing/self-diagnosis LED emergency tube has quickly risen to be the #1 selling Emergency LED T8 tube in the market.

“

Facilities management team across all segments can now save more on material and operation costs on their emergency lighting equipment by using Aleddra's innovative Emergency LED T8/T5 lamps.”

Matthew Maa

Aleddra's customers have asked for a 2-ft version of the Gen4 EM T8 and TODAY, Aleddra is pleased to announce that the 2-ft Gen4 EM T8 tube will be In Stock by the end of November along with the NEW 4-ft Gen4 EM T5 tube.

Features and Benefits of the Aleddra Gen4 EM T8 & Gen4 T5 tubes are:

- The Gen 4 Series (T8 and T5) with a “built in” lithium battery will operate as a standard LED tube (with or without a wall switch in the circuit) and as an Emergency LED tube during power outages.
- Automatically Self-Testing monthly for 30-second test

and annually for 90-minute test.

- Self-diagnosis – If the battery does not meet specifications the LED indicator light on the

endcap will flash “rapidly” notifying the user to replace the tube.

- 40-50% cost savings as compared to purchasing and installing an emergency ballast.
- Eliminates the need for the emergency ballast(s) as well as standard ballast(s).
- 90% labor savings on replacement (plug & play)
- 95% operation savings on monthly/annual [emergency lighting](#) equipment audit.
