

# KOGI CEO System: AI-Powered Management Solutions for New Era of Remote Work

*KOGI enables successful digital transformation and effective remote work coordination through its AI-powered CEO System.*

TAIPEI, TAIWAN, November 6, 2020 /EINPresswire.com/ -- KOGI, an AI and IoT design company that helps enterprises coordinate team management and optimize investment strategies, is showcasing its latest product, the [Corporate Employee Optimization \(CEO\) System](#), at various events later this year and throughout 2021.

Due to the Covid-19 pandemic, management tasks such as team collaboration, communication, task tracking, productivity, and ensuring data security have become more challenging than ever. KOGI enables successful digital transformation and effective remote work coordination through its AI-powered CEO System. Its mobile [customer relationship management \(CRM\)](#) software is specifically designed to boost

productivity during remote work time. The company's patented AI assistant service includes biometric identity confirmation, location confirmation, time attendance, and task management. With IoT use on the rise across the globe, going forward KOGI sees a lot of potential for new applications in the retail, agriculture, and healthcare space.

“

KOGI believes AI will redefine all industries. We aim to become a key contributor in AI designs, and it will be our core corporate focus for the next decade.”

*Gavin Lee, CEO*

“We're confident that with a CEO, enterprises can better manage teams, minimize human-to-human contact, and improve operational efficiency via data-driven decision

**INNOVATION IN AI & IOT DESIGNS**

making," said KOGI CEO Gavin Lee. "We also recognize the shift to remote work raises serious concerns over user privacy and data security. With that in mind, KOGI's CEO System performs data encryption on-site prior to cloud uploading, in which no image data is involved in the authentication process."

### Top Competitive Advantages:

- AI facial recognition module powered by deep learning
- Situation Room with Intelligent BI
- Privacy protection of encoded information prior to cloud uploading
- Intuitive platform design for easy customer data access

### About KOGI

Founded in 2016 and headquartered in Taipei, Taiwan, KOGI is an advanced leader in developing innovative applied AI and IoT technology to resolve business obstacles and optimize performance. It is looking to transform the way enterprises communicate. KOGI empowers and inspires people to look at quantified business data so they can make accurate, scientifically-grounded decisions that maximize operational efficiency. **Corporate Employee Optimization (CEO) System:**  
Your Best Digital Business Transformation Partner  
**Mobility + Digitalization + Efficiency**

**AI Face Recognition:**  
AI engine allows easy registration, speed and accuracy under most indoor & outdoor environments, even if the person decides to wear some fashion pieces on him/her.

**Location Confirmation:**  
Satellite GPS and/or WiFi signal capture to pinpoint user location, in or out of the country. Solution can integrate with access control for office, and meeting location confirmation.

**Task / Progress:**  
Employees can receive tasks from reporting manager(s) or set tasks for themselves to inform the leadership. Progresses are digitally inputted on mobile device for real-time updates & record keeping.

**Corporate Optimization:**  
Avoid over-meeting that set back your employees' performance. CEO system allows leadership to understand real-time progress of employees with graphical outcomes. Employees also have quantified data to prove their performance.

**Digital Business Transformation:**  
Today's businesses have become more digitized than ever, are your company executives equipped with the necessary tools in face of modern management challenges? KOGI's CEO system provides a comprehensive solution to incorporate mobile attendance, location verification, customer management and digitized task/progress record over cloud for real-time situation assessment and make business decisions based on quantified data.
