

MTM Technologies Introduces Networking Built for the Real World

*Disruptive Technology Solution Provider
Launches SDWAN for Today's Remote
Workforce*

PURCHASE, NY, US, November 10, 2020 /EINPresswire.com/ -- Your workforce is remote, working from home or small offices. Even larger offices now feel like a series of branch offices that serve smaller groups of employees. To better serve the networking needs of today's real-world, distributed workforce, [MTM Technologies](#), a Cisco Gold Partner with Cisco Customer Experience Specialization, today announced its [Software Defined Wide Area Networking](#) for Distributed Workforces (SD-WAN-DW) and managed services solution. Built on Cisco's WAN Edge and Meraki technologies to provide secure access, a seamless user experience, and end to end visibility when connecting to cloud applications, the MTM Technologies SD-WAN-DW and managed services solution empowers your organization's IT teams to centrally manage a globally-distributed workforce – including branch offices as well as work-from-home employees — while also reducing costs. Disruptive Technology Solution Provider Launches SDWAN for Today's Remote Workforce

"With today's distributed, anywhere, anytime workforce, it has become increasingly critical to provide a flexible and secure wide area networking solution that can be centrally managed from the cloud," says Anthony Oligino, VP of Technology Solutions at MTM Technologies. "We developed our SD-WAN-DW and managed services solution to enable organizations to recreate the IT experience of being in the office no matter where your workforce is located, whether

they're at headquarters, a branch or working-from-home."

The MTM Technologies SD-WAN-DW Solution

MTM created a series of video scenarios detailing how its SD-WAN-DW solution delivers secure real-world access to enterprise resources for globally-distributed employees:

- **Headquarters** – Enable your headquarters or main office to become the central hub of communications and IT management without impacting overall network bandwidth. Watch our Real-World in New York City video to see how SD-WAN-DW can help you save money and deliver improved connectivity requirements at <http://bit.ly/MTM-NYC-SDWAN>
- **Manufacturing & Distribution** – Improve the capacity and performance of your global network. Watch our Real-World in Singapore video to see how SD-WAN-DW can help you reduce the complexities of WAN traffic management across multiple locations and regions at <http://bit.ly/MTM-ASIA-SDWAN>
- **Retail** – Reduce the costs for deploying and supporting your enterprise network. Watch our Real-World in Paris video to see how SD-WAN-DW can help you automatically optimize WAN traffic and application performance while reducing costs at <http://bit.ly/MTM-EURO-SDWAN>
- **Work-From-Anywhere** – Provide remote working for the long haul and recreate an IT experience like being in the office. Watch our Work-From-Anywhere video to learn how our SD-WAN-DW solution can help you extend the IT experience, eliminate risks, and plan for the future for your work-from-anywhere teams at <http://bit.ly/MTM-WFA-SDWAN>
- **Real-World SD-WAN FAQ** – Watch our FAQ video to get the facts about how an SD-WAN can benefit your organization at <http://bit.ly/MTM-FAQ-SDWAN>
- **MTM Technologies for SD-WAN-DW** – Watch our video that details why MTM Technologies is the right partner for your Real-World SD-WAN needs at <http://bit.ly/MTM-WHY-SDWAN>

Cisco WAN Edge & Meraki Components + MTM Managed Services

The MTM Technologies SD-WAN-DW and managed services solution leverages Cisco SD-WAN routers and appliances that deliver secure, cloud-scale architecture, along with the Cisco vManage console, to quickly connect data centers, branches, campuses, and remote work-from-home locations to improve network speed, security, and efficiency. The MTM Technologies SD-WAN-DW and managed services solution includes:

- **Cisco Catalyst, ISR, and vEdge Routers** – Provides high-performance branch and campus routing with integrated network services.
- **Cisco Meraki MX Security & SD-WAN Enterprise Appliance** – Provides a cloud-managed set of capabilities from an all-in-one device to deliver secure hub-centric connectivity, as well as application quality of experience (QoE), through advanced analytics with machine learning.
- **Cisco Meraki Z3 [Teleworker](#) Solution** – Provides fast, reliable, and secure network connectivity from anywhere for mission-critical and sensitive data. The Z3 is perfect for BYOD or company-issued devices, providing easy device management through a cloud-based dashboard. It also offers a predictable customer experience through high-quality VoIP communication, so work-from home feels just like work-in-office.
- **MTM Technologies Managed Services for SD-WAN Environments** – Provides tactical support that allows our clients to redirect their resources toward strategic initiatives that transform their

businesses. Our consumption-based services allow business operations to function more efficiently, at predictable and controlled costs leaving room for innovation and growth.
