

Sunwest Roofing Provides Commercial Roofing Maintenance and Repair Services to Businesses in the Southwest

One of the nation's leading providers of roofing systems for both commercial and residential is providing services for businesses in the Southwest.

ALBUQUERQUE, NEW MEXICO, UNITED STATES, November 10, 2020 /EINPresswire.com/ -- Representatives with Sunwest Roofing announced today that it provides [commercial roofing](#) maintenance and repair services to businesses in the Southwest.

"We're very excited to provide professional commercial roofing maintenance and repair services to businesses in the Southwest," said Manuel Alvarado, owner, and spokesperson for [Sunwest Roofing, LLC](#), a company that's a member of the BBB, National Roofing Contractor's Association (NRCA), New Mexico Roofing Contractor's Association, and is known for its certified contractors, installers, and is authorized to offer the highest level of warranties on the market today.

Alvarado explained that commercial roofing in the Southwest presents unique challenges.

"Our dry climate and ever-present sun damage our roofs more than other roofing markets," Alvarado said. "Keeping the interior dry has always been the main goal; however, keeping your building cool in the summer and warm in the winter are considerations that run a close second."

At Sunwest Roofing, Alvarado said, customers will find that its team continually meets the unique needs of each of its commercial customers.

"Our reputation has been built on top customer service and product reliability, and our growing list of commercial clients proves that we continue to successfully meet their toughest challenges," Alvarado pointed out. "We've worked with homeowners, contractors, architects, developers, investors and property managers across Arizona, New Mexico, Colorado, and the Texas Panhandle to put new roofs on multi-family developments, small and large commercial shopping centers, military bases, institutional buildings, restaurants, nursing homes, and churches. We provide consistent, reliable, and cost-effective solutions, whether your building is

under construction or is simply in need of a new roof.”

Alvarado noted that this year marked 30 years in business for Sunwest Roofing, helping commercial and residential customers.

"We consider it an honor to provide high-quality commercial and residential roofing services to our customers for 30 years," Alvarado said.

Sunwest Roofing has been recognized by many roofing manufacturers as certified installers and authorized to offer the highest level of warranties on the market today. Sunwest Roofing provides roofing systems for both Commercial and Residential customers in Albuquerque, Phoenix, Colorado Springs, and Denver.

As a bonus, the company is now offering free estimates. Alvarado revealed that anyone interested in receiving a free estimate can do so by filling out a short [form](#) on the company's website.

"Our team of roofing professionals have a wealth of knowledge and experience in our unique market," Alvarado stressed before adding, "Our goal is perfection. We will analyze your unique roofing needs and engineer a roofing system that is suitable for you. Our specialized roofing products allow us to provide commercial roof level quality for our residential customers."

The offering of free estimates comes on the heels of Sunwest Roofing being accepted into the SBA 8(a) program.

Alvarado explained that the process of gaining 8(a) (<https://www.sba.gov/federal-contracting/contracting-assistance-programs/8a-business-development-program>) approval was lengthy and stringent and now wants to let the world know - especially contracting officers that Sunwest Roofing is certified and able to take on 8(a) set-aside contract opportunities.

SBA (8a) is an ownership/diversity certification sponsored by the SBA. The 8(a) program is a nine-year business development program that provides business training, counseling, marketing, and technical assistance to small businesses that have been certified. The first four years of the program are the developmental stage, and the last five years are the transition stage.

The goal of the program is to have 8(a) firms graduate from the program and go on and thrive in a competitive business environment. The federal government's goal is to award at least five percent of all federal contracting dollars to small disadvantaged businesses each year.

"This is a huge accomplishment for us, and we're excited about the opportunities awaiting us," said Alvarado.
