

Machine 500, Redefining the CNC Machine Sourcing Process

TAIPEI, TAIWAN, November 11, 2020 /EINPresswire.com/ -- Machine 500 leads the way with a global Computer Numerical Control (CNC) machine sourcing search engine. It is a machine tool information platform that enables users to survey all machines with reviews from other machine users. Machine 500 will be launching their new product, machine search engine and rating system at the upcoming [CNC machine](#) related maker events.

Machine search engine and rating system is the first one click solution

platform with more than 1000 different models, targeting to provide users and buyers with the best suitable machine. Searching for the ideal machine is often tedious work, however with the machine search engine and rating system, buyers can easily access all necessary information and quotation in one click and compare the pros and cons to help them determine the machine

“

Save time on searching machines, and we can spend our treasure time to do machining.”

James Huang

that best meets their needs. Machine 500 is committed to solving the cumbersome sourcing process for machine buyers, and sees a tremendous opportunity in changing the CNC machine purchasing process and providing better user experience.

Top Competitive Advantages:

- One click solution to get quotations and machine

specification

- Customer rating system
