Center Valley dentists at Castle Dental providing dental implants

[Dental implants in Center Valley](#) are Castle Dental's most popular service. They are the most predictable, most successful, and longest-lasting missing tooth replacement currently available.

“

Millions of Americans currently have dental implants.”

Dr. Matthew Lang

The implant is placed into the jawbone to replace a missing tooth root. Then, an abutment and porcelain crown are added to give the implant a more natural-looking finish.

“Millions of Americans currently have dental implants,” says Dr. Matthew Lang. “They are not only aesthetically pleasing but can help preserve a patient’s jawbone and

prevent early aging.”

Covered in the cost of dental implants are the abutment, crown, x-rays, and any supplementary procedures.

In addition to dental implants, same-day CEREC crowns are also available. CEREC 3D technology creates color-matched ceramic crowns that can replace missing or damaged teeth in as little as one visit. Other onsite ceramic restorations include fillings and veneers.
