Description

Wiseguyreports.Com Adds "Online Convenience Services -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2025" To Its Research Database

When Queen Margherita visited Naples in 1889 and fell sick after eating rotten food, Chef Raffaele Esposito of Pizzeria Brandi had the honor of serving a pizza to the queen.

Since the visiting royalty could not come to Esposito's pizzeria, the chef carried it to the palace himself. It was a pizza with basil, mozzarella and tomato (to match the Italian flag). He called it the Pizza Margherita. This is widely regarded as the first instance of a pizza delivery service.

It is widely believed that what can be measured can be improved. Our rising demands for convenience have created a whole ecosystem on consumer product and service delivery systems. While efficiencies of delivery are constantly being improved upon, to reduce time to delivery, the environmental impact of the delivery ecosystems are generally not looked at. From single use packaging to last mile connectivity, these services play an impact on the environment and therefore on climate change.
