

# Innova Solutions launches a SaaSOps practice partnering with leading SaaSOps solution provider BetterCloud

*The SaaSOps practice creates a unique opportunity for clients to discover, manage, and secure their entire portfolio of SaaS applications*

DULUTH, GEORGIA, UNITED STATES, November 18, 2020 /EINPresswire.com/ -- [Innova Solutions](#)

BetterCloud's SaaSOps platform enables us to provide value-added SaaS services and help clients rationalize and optimize their SaaS portfolio to minimize overhead and lower costs."

*Brian Amirian, Chief  
Technology Officer, Innova  
Solutions*

(Innova, an ACS Solutions company), a leading provider of digital services, cloud optimization, and migration, today announced the formation of a partnership with [BetterCloud](#), a leader in SaaS Operations ([SaaSOps](#)) for managing and securing the digital workplace.

By coupling BetterCloud's SaaSOps platform with Innova's ability to deliver business value through world-class SaaS professional and managed services, this partnership creates a unique opportunity for clients to discover, manage, and secure their entire portfolio of SaaS applications. Innova will resell and distribute BetterCloud as its preferred SaaSOps solution combined with Innova's value-added cloud enablement services to accelerate and

optimize our clients' cloud journey.

Forrester Research recently published a report on October 22, 2020 titled "Best Practices For Software-As-A-Service Operations - The Need For SaaS Operations Is High, Yet Enterprise Maturity Is Lacking". The report states that SaaS is becoming an ever-increasing percentage of installed software functionality. Forrester says that, in fact, SaaS makes up a significant portion of total product revenue spend in major application categories — 88% of desktop and collaboration apps, 83% of e-purchasing, and 76% of Customer Relationship Management.

Furthermore, the report states: "As support responsibilities for SaaS solutions are shared between the customer and the SaaS vendor, how a vendor handles each operational function differs for each supplier/application. This creates inconsistencies in operations and a great burden for IT teams in supporting the SaaS portfolio as a whole. ... I&O professionals are facing a time of transition as conventional guideposts in process management and governance give

way to new models such as resilience engineering. With the increasing complexity represented by the growing SaaS estate, SaaS operations must be part of this shift. ...only AI and automation can help deal with the scale of new demands and the increasing threat landscape. I&O pros must borrow from what they've learned from DevOps."

"Our SaaS Ops practice caters to the SaaS-related challenges our enterprise clients face. The partnership with BetterCloud allows us to provide value-added services such as SaaS discovery and assessment, automation of user lifecycle management, and improved SaaS security with trigger inputs and automated workflow," said Brian Amirian, Innova Chief Technology Officer and SVP of Cloud and Workplace Services. "The platform also enables us to help clients rationalize and optimize their SaaS portfolio to minimize overhead and lower costs."

"Our new partnership allows BetterCloud to augment Innova's impressive portfolio of cloud optimization and managed services," said Shreyas Sadalgi, BetterCloud Chief Business Strategy Officer. "By partnering the industry's comprehensive SaaS Management Platform with one of the industry's most comprehensive SaaS management service providers, our clients and customers will gain a competitive advantage as they move to the cloud."

Organizations undergoing rapid digital transformation and SaaS adoption can learn more about how Innova's SaaS Ops practice can solve challenges around automation of onboarding and offboarding, identity & access, data protection, regulatory compliance and spend management of SaaS applications: <https://www.innovasolutions.com/saasops>.
