Breaking renewable energy/solar stock news

from Investorideas.com Newswire and RenewableEnergyStocks.com - Solar Integrated Roofing Corp. (OTC: SIRC), an integrated, single-source solar power and roofing systems installation company, announced today that it has realized record revenue quarter-to-date, seeing revenues of greater than \$3.3 million for the months of September and October 2020.

“The third quarter of 2020 has been highlighted by continued growth of our highly complementary solar and roofing businesses,” said David Massey, Chief Executive Officer of Solar Integrated Roofing Corporation. “With supportive industry trends driving increased solar adoption and our significant cross selling opportunities across solar, battery backup installation, roofing and related HVAC/electrical contracting work, we have driven what I expect to be a record third quarter, with year-over-year revenue growth in excess of 50% to \$3.3 million at an expected 40% gross margin for the months of September and October 2020.

“As we continue to achieve scale through acquisition, such as our recently announced HVAC acquisition or potential future Enerev acquisition after the completion of our 30-day joint venture, I would expect continued record-breaking results for us as we fully realize the immense cross-selling benefits that face us today,” concluded Massey.
