

## Global 3D Printer Software Market 2020 Segmentation, Demand, Growth, Trend, Opportunity and Forecast to 2025

"3D Printer Software - Market Demand, Growth, Opportunities, Manufacturers and Analysis of Top Key Players to 2025"

PUNE, MAHARASHTRA, INDIA, November 18, 2020 /EINPresswire.com/ -- Updated Research Report of <u>3D Printer Software Market 2020-2025:</u>

## Summary:

Wiseguyreports.Com Adds "3D Printer Software - Market Demand, Growth, Opportunities, Manufacturers and Analysis of Top Key Players to 2025" To Its Research Database.

## Overview

Post-COVID-19, the global 3D printing market size is estimated to grow from USD 11.4 billion in 2020 to USD 30.2 billion by 2025; it is expected to grow at a CAGR of 18% during 2019–2025. The market in 2020 is estimated to see a drop of more than 19% in comparison to the pre-COVID 2020 estimates. A key reason for this is that although the operation of 3D printers is expected to be high in 2020, most of the activities for which the printers/services are being employed are being done free of cost during this time of need.

Printer sales are expected to stagnate in 2020 but will pick up again during the forecast period showing healthy double-digit growth rates

The 3D printing market will continue to generate revenue in 2020 although not as much as initially estimated before the pandemic. The losses of the first half of the year are expected to be compensated to a certain extent by the revenue generated in the second half of the year. Growth in the following years is expected as a result of backlog orders across all end-user industries as well as sales from new customers who previously had not thought of employing 3D printers until the pandemic had shown the benefits.

Material sales will follow a similar trend to that of printers, with players in the future investing more on emerging material types

The revenue generated from the sale of materials for 3D printers would be following a similar trend as that of printers during the forecast period. Large volumes of printing may be taking place in the first quarter of 2020, however, in most of the cases, the materials have been provided free of cost. There will be a focus on the use of emerging materials for printing during the forecast period, however, the benefits of the same will start to emerge after the forecast period.

Overall, the 3D printing market will continue to be resilient during and post the COVID-19 pandemic

The overall 3D printing market will witness a contraction in potential revenue that could be generated. For example, the drop in anticipated revenue for 2025 is expected to be USD 6.3, however, this is far better than what many other industries would be witnessing now as a result of the various implications of COVID-19. The encouraging fact for the 3D printing industry, however, is that the return to double-digit growth rates is expected to take place as early as next year, which is especially attractive for new players planning on entering the market in the next few years.

Segmentation by type: breakdown data from 2015 to 2020 in Section 2.3; and forecast to 2025 in section 10.7.

On-premise

On-cloud

Segmentation by application: breakdown data from 2015 to 2020, in Section 2.4; and forecast to 2025 in section 10.8.

This report also splits the market by region: Breakdown data in Chapter 4, 5, 6, 7 and 8. Americas
United States

Canada
Mexico
Brazil
APAC
China
Japan
Korea
Southeast Asia
India
Australia
Europe
Germany
France
UK
Italy
Russia
Middle East & Africa
Egypt
South Africa
Israel
Turkey
GCC Countries
The report also presents the market competition landscape and a corresponding detailed analysis of the major vendor/manufacturers in the market. The key manufacturers covered in
this report: Breakdown data in in Chapter 3.
Stratasys
DWS 2D Systems
3D Systems
Voxeljet Envision Tec
EOS
Bucktown Polymers
Taulman 3D
Carima
Asiga
ColorFabb
Esun
Mitsubishi Chemical
In addition, this report discusses the key drivers influencing market growth, opportunities, the

In addition, this report discusses the key drivers influencing market growth, opportunities, the challenges and the risks faced by key players and the market as a whole. It also analyzes key emerging trends and their impact on present and future development.

Key questions answered in the report:

What will the market growth rate of 3D Printer Software market in 2025?

What are the key factors driving the global 3D Printer Software market?

What are sales, revenue, and price analysis of top manufacturers of 3D Printer Software market?

Who are the distributors, traders and dealers of 3D Printer Software market?

Who are the key manufacturers in 3D Printer Software market space?

What are the 3D Printer Software market opportunities and threats faced by the vendors in the global 3D Printer Software market?

What are sales, revenue, and price analysis by types and applications of 3D Printer Software market?

What are sales, revenue, and price analysis by regions of 3D Printer Software market? What are the market opportunities, market risk and market overview of the 3D Printer Software market?

@Have Any Query? Ask Our Expert: <a href="https://www.wiseguyreports.com/enquiry/5441586-global-3d-printer-software-market-growth-status-and-outlook-2020-2025">https://www.wiseguyreports.com/enquiry/5441586-global-3d-printer-software-market-growth-status-and-outlook-2020-2025</a>

Major Key Points in Table of Content

- 1 Scope of the Report
- 2 Executive Summary
- 3 Global 3D Printer Software by Company
- 4 3D Printer Software by Regions
- 5 Americas
- 6 APAC
- 7 Europe
- 8 Middle East & Africa

9 Market Drivers, Challenges and Trends
10 Marketing, Distributors and Customer
11 Global 3D Printer Software Market Forecast
12 Key Players Analysis
