Independent view of Proteus Schrems II software sets the bar high for other data privacy solutions

Info-Tech Research Group reviews Proteus-Cyber's new Schrems II tool

LONDON, UNITED KINGDOM, November 18, 2020 /EINPresswire.com/ -- In her latest research article, Cassandra Cooper, Lead Data Privacy Analyst at Info-Tech Research Group, wrote about the implications of the new Schrems II ruling and the inconvenience it would cause organisations that had previously relied on Privacy Shield for international data transfers with the EU; specifically the likely requirement for such organisations to put in place with each vendor new Standard Contractual Clauses (SCCs) that are specific to the data transferred.

> " Proteus-Cyber's TIA feature is an optimal combination of efficiency and customization and has set the bar high for other privacy program management and compliance software solutions to follow suit."
>
> *Cassandra Cooper, Info-Tech Research Group*

In her article Cooper also takes a look at a solution that can help organisations reduce the effort and time needed to embrace the new rules by automating the process of establishing these new SCC contracts, from collecting the information required for Annex B through to generating the contracts themselves and getting them signed off.   In conclusion she writes, "Proteus-Cyber's TIA feature is an optimal combination of efficiency and customization and has set the bar high for other privacy program management and compliance software solutions to follow suit."

Further details on the implications of the Schrems II ruling and the assistance Proteus NextGen Schrems II software provides may be found on their website https://proteuscyber.com/Schrems-II-Automatic-SCC-contracts
