TurnKey Internet Launches Customer Loyalty Bonus Program for Black Friday

TurnKey Internet announced today their Customer Loyalty Bonus program combined with the launch of their Black Friday Deals on Dedicated Servers and Web Hosting.

LATHAM, NEW YORK, UNITED STATES, November 18, 2020 /EINPresswire.com/ -- Leading Data Center and Cloud Hosting Solutions provider TurnKey Internet announced today their Customer Loyalty Bonus program combined with the launch of their 2020 Black Friday Deals offering some of the best Dedicated Servers, Cloud Servers, and Web Hosting offers for 2020.

TurnKey Internet is known for running its eagerly awaited, industry-leading deals and specials, and this year is no different. TurnKey Internet is offering up to 90% off on nearly every product they offer – Dedicated Servers, Cloud Servers, Web Hosting, and much more. More information can be found at https://turnkeyinternet.net/blackfriday/

In a bold move in contrast to other companies that exclude or limit their best seasonal deals from existing clients – TurnKey is rewarding existing clients with an additional loyalty bonus. The loyalty bonus is applied as a free month of service for every previous year of loyalty when purchasing additional services during this Holiday promotional period. This gives existing clients access to deals greater than 90% off when factoring in the free loyalty bonus months of service included.

"We love our loyal clients and realize our success comes from the trust our clients have placed in us over the years. I am truly excited to launch our Customer Loyalty Bonus program during our Holiday promotion," remarked Adam Wills, CEO of TurnKey Internet. "While most companies offer only their best deals to new customers, we shake up that model and put the customer first. TurnKey is focused on giving back to our clients – and in turn they are our best advocates telling friends and colleagues about their experience."
