

Greiner Bio-One Announces Virus Stabilization Tube for SARS-CoV-2 Available for Healthcare Facilities

Critical product supply now available as COVID-19 cases continue to rise in many states.

MONROE, NORTH CAROLINA, UNITED STATES, November 23, 2020 /EINPresswire.com/ -- Greiner Bio-One is announcing the availability of the [VACUETTE® Virus Stabilization Tube](#), which is intended for the transport and storage of nasopharyngeal and oropharyngeal swab specimens. The VACUETTE® Virus Stabilization Tube is to be used by healthcare professionals for SARS-CoV-2 testing.

The ability to meet the current need in the United States for adequate SARS-CoV-2 testing is dependent on the availability of the collection and transport products that are necessary to perform this testing in the manner outlined by the FDA. The virus stabilization tube manufactured by Greiner Bio-One is a crucial part of the testing process and ensures sample stabilization from the point of collection to arrival at a testing laboratory.

As a manufacturer of blood and other specimen collection products with decades of experience, Greiner Bio-One is able to meet the demand for testing products quickly and efficiently to the hospitals, nursing homes, regional reference labs, and the United States government.

Additional Product Information

Virus Stabilization Tube with Swab

[VACUETTE® Virus Stabilization Tubes](#) are 13 x 100mm tubes made of PET with a pre-defined volume of a phosphate-buffered saline solution at a pH of 7.4±0.2 to allow for the storage of the SARS-CoV-2 swab specimens for up to 72h at 4°C.
