

AKASO Brave 7 Gives Vloggers Total Control

Innovations Include Dual Front & Back Displays, Underwater Mode

FREDERICK, MARYLAND, UNITED STATES, November 23, 2020 /EINPresswire.com/ -- [AKASO](#), the world's leading manufacturer of affordable, crystal-clear action cameras, is giving adventurers and on-location vloggers total control over their video production. The company's new Brave 7 model offers revolutionary dual color displays. Videographers can switch between views to easily monitor the camera's framing and angles using the 2-inch back touch screen. And they can activate an easy-to-view front control display to capture the perfect video or still-photo selfie.

AKASO's Brave 7 also includes a new underwater functionality not seen on action cameras at twice the price. Proprietary IPX8 technology makes the camera water-resistant for up to 30 minutes to depths of 10 meters. Red-boosting dive mode compensates for blue underwater environments, so you can document your scuba, snorkeling, cliff diving, water skiing, and other lake and ocean vacation in true-to-life tones.

No matter how you satisfy your adrenalin craving, the [AKASO Brave 7](#) brings it home with next-generation electronic image stabilization. The onboard six-axis gyro corrects for tilt and motion so your image is always steady and smooth, no matter what recreational or vlog activity you need to document.

The [AKASO GO app](#) adds publishing functionality, with robust video editing tools. Transfer footage directly to your smartphone – no computer required – for immediate posting to social media.

Brave 7 can be set to record high-quality under a variety of conditions. The one-click delay setting creates dramatic starry-sky exposures. The versatile Brave 7 camera also can be set as an automobile dashcam, record video loops and take timed and interval photos.

Finally, AKASO has equipped the Brave 7 with several powerful, intuitive controls tools for adding breathtaking effects to professional-quality action videography:

- **Crisp, 4k Reproduction** – 20-megapixel photos and professional quality video at 30 frames per second under any weather or lighting conditions
- **High-Fidelity Audio** – Quality built-in microphone and AKASO external microphone input.

- Variable Camera Angles –170-, 140-, 110- and 70-degree settings
- On-the-go Control – Wireless wrist-worn LCD remote control and hands-free commands

With a retail price of \$149.99, the AKASO Brave 7 combines all the features vloggers and video professionals demand at less than half the cost of comparable competing products. The Brave 7 will be available on the company's website, www.akasotech.com on December 1, making it an ideal holiday gift. Amazon.com will feature the new model starting in mid-December.

About AKASO Tech, LLC – With sales of more than a half billion units annually, AKASO builds high quality, affordable action cameras that document users' most stunning adventure moments.
