

PKG, Inc. becomes key manufacturer for ClearMask™ and Xometry

The first fully transparent, FDA-cleared mask produced in the USA is made possible through a manufacturing partnership between ClearMask LLC, Xometry, and PKG.

MERIDIAN, IDAHO, UNITED STATES,
November 25, 2020 /

EINPresswire.com/ -- The first fully transparent, FDA-cleared mask produced in the United States is made possible through a manufacturing partnership between ClearMask LLC, Xometry, and PKG Inc.

ClearMask™ is the world's first FDA-cleared, fully transparent surgical mask suitable for hospitals, clinics, schools, retail, hospitality, and other settings. The mask is optimized for maximum clarity and comfort, and meets

applicable ASTM Level 3 requirements for fluid resistance and flammability, which offers a high level of protection for medical use in environments such as operating rooms.

See the person, not the mask

“

We are proud to help ClearMask fight against the pandemic with a smile on our face that everyone can see.”

*ALMIR GARIBOVIC, PRESIDENT
OF PKG*

“In this disheartening time as the world fights against the COVID-19 pandemic, the ClearMask™ helps protect while bringing much-needed relief through a reassuring smile and familiar face among fear and confusion and suffering. In addition to blocking particles or droplets with its fully transparent, anti-fog plastic barrier, the ClearMask™ helps improve visual communication, which may help avoid costly errors and adverse outcomes. Transparent communication during the customer experience can be critical in establishing rapport and earning trust while

assuring safety as a priority," announced ClearMask in its [press release](#).

To meet the rigorous controls necessary for FDA-cleared products, ClearMask LLC and Xometry, the largest marketplace for On-Demand manufacturing, partnered with PKG Inc., an ISO 13485-certified facility, to manufacture the FDA-cleared version of the ClearMask™. PKG will provide valuable experience in building FDA-approved products, enabling mass production while achieving rigorous oversight and high quality.

This November, PKG Inc. officially kick-started a new production floor designed to meet the mass production of the FDA-cleared ClearMask™, which has been in high demand.

Over a few weeks, PKG Inc. will fully transition company ownership to the Cerebain Biotech Corporation in an acquisition that began in the middle of this year. Upon completion, under the Cerebain Biotech umbrella, PKG Inc. will continue its support in mass-producing large volumes of the FDA-cleared ClearMask™. "We are proud to help ClearMask fight against the pandemic with a smile on our face that everyone can see." -- ALMIR GARIBOVIC, PRESIDENT OF PKG

"All of us are looking forward to successfully providing innovative accessibility and protection to diverse populations," stated PKG CEO Almir Garibovic.

About PKG

PKG, Inc. specializes in contract design, development, and manufacturing of system-level devices with expertise in human-machine interfaces. With experience in medical, aerospace, government, and industrial products, PKG helps raise your company to the next level by leveraging our engineering and technology integration skills across your product lines. Complete in-house vertical integration of expertise, services, manufacturing processes, and technologies, PKG provides customers with all their product development and manufacturing needs. Besides expertise in system-level devices and human-machine interfaces, PKG offers incubation and acceleration services for startup businesses and entrepreneurs. For more information, visit us at www.pkguis.com

About Cerebain Biotech Corp.

Cerebain Biotech Corp. (OTC: CBBT) is a development-stage medical device company focused on the creation and clinical development of a minimally invasive implantable device and a synthetic drug solution. The device leverages the clinically observable, positive impact that Omentum stimulation has on cognitive function as related to dementias, and in particular, Alzheimer's disease. The corporate vision is based on these positive clinical observations. Visit us at www.cerebain.com or connect with us on Twitter and Facebook to learn more.
