

Exhaustive Study on Electronic Ceramics Market 2027 – Future Scenarios and Business Opportunity Analysis

Increase in demand from the major end-users and the emergence of novel technologies that demand more electroceramics drive the growth of the market.

PUNE, MAHARASHTRA, INDIA,
November 25, 2020 /

EINPresswire.com/ -- Increase in demand from the major end-users and the emergence of novel technologies that demand more electroceramics drive the growth of the global [electronic ceramics market](#). However,

high investment for fabrication and integration hampers the market growth. On the contrary, the development of ceramic solid-state battery technology is expected to create lucrative opportunities for the market growth.

As per the report, the global electronic ceramics industry was pegged at \$11.3 billion in 2019, and is projected to reach \$16.6 billion by 2027, growing at a CAGR of 5.1% from 2020 to 2027.

Covid-19 scenario:

- China is the major supplier of electronics. The abrupt shutdown of operations due to the Covid-19 outbreak hampered the entire electronic ecosystem.
- The Covid-19 pandemic disrupted the supply chain and created a shortage of raw materials.
- The pandemic hampered smartphone sales in the first quarter of 2020 and major smartphone companies had to make contingency plans for the future.
- However, as organizations adopted work from home culture, the demand for wireless networks and consumer electronics such as laptops and smartphones has been increased.

Electronic Ceramics Market

The alumina segment held the lion's share:

By material, the alumina segment held the largest share in 2019, accounting for around two-fifths of the global electronic ceramics market, as it is used for thick-film and thin-film ceramic substrates. However, the silica segment is anticipated to register the [highest CAGR](#) of 6.4% during the forecast period, due to rise in demand for miniaturized electronic components such as capacitors for avionics, automotive systems, aerospace, and military applications.

The optoelectronic devices segment to manifest the highest CAGR through 2027:

By applications, the optoelectronic devices segment is expected to portray the highest CAGR of 6.3% from 2020 to 2027, owing to the increase in use of such devices in the aerospace, IT, automotive, and healthcare industry. However, the capacitors segment dominated the market in 2019, accounting for nearly one-third of the global electronic ceramics market, due to rise in demand for miniaturized electronic components such as capacitors for avionics, automotive systems, aerospace, military, and industrial telecommunication systems.

Asia-Pacific, followed by North America, to register the fastest CAGR by 2027:

By region, the market across Asia-Pacific is projected to manifest the highest CAGR of 6.1% during the forecast period. The region held the largest share in 2019, accounting for more than half of the market, owing to high consumer presence in countries such as India, China, Japan, and Taiwan coupled with the presence of a well-established electronic manufacturing base in Asia-Pacific. However, the global electronic ceramics market across North America is expected to register a CAGR of 4.9% from 2020 to 2027.

Key Market Players

- American Elements
- CoorsTek Inc.
- Compagnie de Saint-Gobain S.A.
- Höganas AB
- Ferro Corporation
- 3M Harris Technologies Inc.
- Shihara Sangyo Kaisha Ltd.
- Physik Instrumente GmbH & Co. KG.
- Merck KGaA
- Noritake Co. Ltd.
- Wenzel Materials Plc.
- Sensor Technology Ltd.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of

Allied Analytics LLP, based in Portland, Oregon. AMR provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

AMR introduces its online premium subscription-based library Avenue, designed specifically to offer cost-effective, one-stop solution for enterprises, investors, and universities. With Avenue, subscribers can avail an entire repository of reports on more than 2,000 niche industries and more than 12,000 company profiles. Moreover, users can get an online access to quantitative and qualitative data in PDF and Excel formats along with analyst support, customization, and updated versions of reports.
