Dehumidifier is a utility device used for the removal of humidity/moisture and to control air quality. Ongoing development of the real estate sector, changes in weather conditions, rise in disposable income, and increase in awareness among consumers toward healthy & comfortable living drive the market. However, high cost and seasonal demand of the product restrict the Europe dehumidifier market growth. Cost of dehumidifiers is

based on various factors such as capacity of selected product, outlet design, and difficulty in installation. Moreover, they need regular and continuous maintenance and cleaning, which incur

additional cost, which limit their demand in Europe.

The demand for residential dehumidifier is influenced by rise in trend of sustainable energy framework in Europe, as consumers actively seek for energy-efficient products. Moreover, ongoing smart housing developments drives the demand for energy-efficient residential dehumidifiers.
