

Breakthrough Black Friday pricing on ascribe.ai transcription

\$1 per hour price makes transcribing large amounts of video or audio a nobrainer

BOSTON, MA, USA, November 27, 2020 /EINPresswire.com/ -- axle ai, the leader in the future of work for media teams, is offering its powerful ascribe.ai transcription at a Black Friday price that's affordable for nearly

any purpose. The increasing power of artificial intelligence and machine learning has led to a revolution in cost, and ascribe.ai minutes can now be purchased for \$1.00 per hour of content transcribed. Content producers and archivists responsible for podcasts, reality shows,

"

The Black Friday pricing we're offering, at \$1 per hour in 10 and 100 hour blocks, makes Al-powered transcription affordable for everyone."

Sam Bogoch, axle ai CEO

courseware and more can now take advantage of this capability for large volumes of work.

Instead of sending the whole video file to be transcribed, ascribe.ai creates an audio-only file that it quickly uploads in the background. The whole process happens faster than realtime; each minute of footage can be transcribed and results returned to the user in as little as 10 seconds. The software supports transcription of English (both American and British dialects), Spanish, French, Italian, Portuguese,

Russian and Korean.

Ascribe.ai is available in two versions: as a plug-in panel for Adobe Premiere Pro (for MacOS or Windows) and as a standalone app (also for MacOS or Windows). Both the panel and standalone app are available as free downloads, and use the same axle Speech services used by the company's flagship axle ai 2020.2 media management system for video teams. However, unlike axle ai 2020.2, no centralized database or shared network storage is required. The panels and apps run directly on any Mac or Windows system and connect with axle ai's Speech cloud service via nearly any connection to perform the transcription.

In the Adobe Premiere Pro panel version of ascribe.ai, transcribed text appears as markers in the

Premiere Pro timeline, as well as in sidecar XMP files which ascribe.ai creates which contain the transcripts. Users also have the option of exporting an industry-standard SRT or VTT file with the transcript as well., obtaining and displaying the transcript as well as pushing all relevant markers to the timeline in Adobe Premiere@ Pro. "Premiere Pro is the industry leader for editing everything from feature films, TV series and beyond," said Sue Skidmore, head of partner relations for Adobe Video, "ascribe, ai makes fast and efficient Al-driven transcription of videos accessible to all Adobe Premiere Pro users."

ascribe.ai is available as a standalone app or Premiere Pro panel

Sam Bogoch, CEO of axle ai, said "Since our company was founded in 2012, we've made it our mission to bring the power of transcription and video search to an ever-wider group of creative teams. With ascribe.ai, we've taken it to a whole new level - the broader universe of freelancers and videographers who may work on their own, or on distributed teams. The Black Friday pricing we're offering, at \$1 per hour in 10 and 100 hour blocks, makes Al-powered transcription affordable for everyone."

Pricing and Availability

Hours of the radically affordable transcription can be purchased from axle ai's User Portal in blocks of 10 hours (\$1.00) and 100 hours (\$100.00) between now and December 1st. These prices, made possible by axle's Al-powered axle Speech cloud service, compare very favorably with prices of other transcription services of up to \$1.00 or more per minute. Languages supported in the initial release are English (both American and British dialects), Spanish, French, Italian, Portuguese, Russian and Korean. More languages will be supported in the future.
