

# Protein Expression Market To Grow Valuation \$4.61 Billion By 2026, At CAGR Of 10.2% | Protein

*The growth in protein expression market is due to rise in prevalence of chronic disease such as diabetes, cancer, autoimmune disorders & cardiovascular diseases*

PORTLAND, OR, UNITED STATES,  
November 30, 2020 /

EINPresswire.com/ -- Protein

expression is defined as a biotechnological procedure, which includes generation of precise

proteins. These proteins are formed

through manipulation of gene expression in organisms of interest. The procedure leads to expression of large amounts of recombinant gene in organisms. Furthermore, this has led to many possibilities of expression and isolation of heterologous proteins for research, clinical, and industrial purposes. This, in turn, has led to advancements in genetic engineering and

“

pharmaceutical companies are significantly investing in R&D expenditure thereby propelling the market growth.”

*Mangesh Panhale*

recombinant technologies. Significant advancements in the field of biotechnology have enabled expression and isolation of recombinant proteins on large scale. Some of products which are used to perform protein expression present in the market include reagents, expression vectors, competent cells, instruments, and others. These products are used in designing therapeutics and conducting research related to medicines.

Protein Expression

The global protein expression market is expected to reach \$4.61 billion by 2026, registering a CAGR of 10.2% from 2018 to 2026, in terms of value.

The factors that boost the growth of the protein expression market include surge in geriatric population and increase in prevalence of chronic diseases such as cancer. Moreover, increase in spending on protein research also fuel the growth of the protein expression market. However, high monetary inputs associated with the production of protein products restrict the growth of the market. In addition, significant shortage of trained healthcare professionals and lack of local expertise also restrains the market. Conversely, emergence of microfluids, along with growth potential in emerging economies is expected to create lucrative opportunities for the market during the forecast period.

The Covid-19 outbreak has severely affected every sector across the world. The patient numbers have been increasing every day and the majority of the countries are in complete lockdown. This has affected the supply chain and overall business operations. International trading has taken a significant downfall and has created uncertainty in the stock market. These factors have affected the protein expression market.

The protein expression report offers an in-depth analysis of the Covid-19 impact on various market segments and countries. Moreover, the report offers major market trends and forecasts, considering the Covid-19 situation.

For Purchase Enquiry @ <https://www.alliedmarketresearch.com/purchase-enquiry/6463>

The global protein expression market is segmented based on product, application, and region.

- Based on product, the market is bifurcated into reagents, expression vectors, competent cells, instruments, and services.
- By application, it is divided into therapeutic, industrial, and research.
- Based on region, it is analyzed across North America (U.S., Canada, and Mexico), Europe (Germany, the UK, Italy, Spain, France, and rest of Europe), Asia-Pacific (Japan, China, Australia, India, South Korea, and, rest of Asia-Pacific) and LAMEA (Brazil, South Africa, Saudi Arabia, and rest of LAMEA).

About Us:

Allied Market Research (AMR) is a full-service market research and business -consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
