PUNE, MAHARASTRA, INDIA, December 1, 2020 /EINPresswire.com/ -- Greenhouse Film Market:

## Executive Summary

Global Greenhouse Film Market is valued approximately at USD 5.8 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 10.3% over the forecast period 2020-2027. Greenhouse Film controls the amount of sunlight, and the temperature of greenhouse. It is used to cover the plants that are grown in a greenhouse in such a way as to maximize the amount of light entering within and also helps to minimize the entry of other harmful environment elements or weather conditions such as such as heavy rain, strong wind, fluctuating temperature, and snow. Rising government spending on agricultural schemes to maximize food production through greenhouse and growing technological advancements in greenhouse film are the few factors responsible for growth of the market over the forecast period. According to Department of Agriculture, Cooperation & Farmers Welfare, in 2018, Indian Government initiated Micro Irrigation Fund created with National Bank for Agriculture and Rural Development (NABARD) with an initial corpus of Rs. 5000 crore or USD 66.67 million (Rs. 2000 crore for 2018-19 & Rs. 3000 crores for 2019-20) for encouraging public and private investments in Micro irrigation. Furthermore, the product launch and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 17th January 2020, Berry Global Inc., announced the expansion of its breathable films capacity which includes the investment of USD 20 million. High cost of installation and adverse effects of plastics on the environment is the major factor restraining the growth of global Greenhouse Film market during the forecast period.
