“Exeter Orthodontics came about because a group of orthodontists was tired of charging patients prices they could not afford for the care they desperately needed,” explains Dr. Soraya Mills. “We keep our overhead low by specializing only in orthodontics, buying quality supplies in bulk, and passing these cost savings on to our patients.”

In addition to braces, Invisalign in Exton also costs only \$3,995. Invisalign aligners are a popular treatment option because of their comfort and convenience. The transparent aligners can be removed as needed, meaning

favorite foods aren't off-limits.

Some patients with more complex cases may be better suited for traditional braces, while other patients with simpler cases may be better suited for Invisalign. Both treatments differ in comfort and compliance, but one thing will always stay the same: their low price.
