New Study Reports "E-bike Market 2020 Global Market Opportunities, Challenges, Strategies and Forecasts 2029" has been Added on WiseGuyReports.

Introduction/Report Summary:

This report provides in depth study of <u>"E-bike Market"</u> using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The E-bike Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

An e-bike, commonly known as an electric bicycle, is a bike that has an electric motor aligned to the pedals of the bicycle, which supplies the differential force required for the forward movement of the bicycle. Earlier, e-bikes were bulky because of the use of lead-acid batteries; however, with the use of nickel-metal hydride, nickel-cadmium cell, or lithium-ion (Li-ion) batteries in newer models, the weight of e-bikes has reduced significantly. Governments of several countries around the world have passed laws that encourage the adoption of green technologies such as electric buses and e-bikes. For instance, China's government has adopted a law to support e-bike users and manufacturers. E-bikes are very effective in reducing the emission of carbon dioxide and other greenhouse gases. It also helps in reducing noise pollution and other types of environmental pollution. Moreover, the government in China has stopped issuing licenses for pedal assisted bicycles that produced harmful emissions, which will further contribute to this market's growth over the coming years. The global e-bike market is characterized by the presence of well-diversified international and regional vendors. However, as the global vendors are increasing their footprint in the market, the regional vendors are finding it increasingly difficult to compete with them, especially in terms of quality. The competitive environment in this market is expected to intensify with product or

service extensions, technological innovations, and M& A. Though there are several regional players with significant market shares, many international players are expanding their presence in China, Germany, and the US.
