

Smart Glass Technologies Taking Bathroom Design Options to the Next Level

The company's PriWatt™ Smart Film reduces electrical consumption and increases privacy with just the switch of a button.

MIAMI, FLORIDA, UNITED STATES, December 7, 2020 /EINPresswire.com/ -- [Smart Glass Technologies](#) is pleased to announce it is helping aspiring and professional designers to re-imagine their bathroom spaces with its innovative PriWatt™ Smart Film.

Smart Glass Technologies is the fastest-growing manufacturer of switchable privacy Smart Film and Smart Glass in the North American market. The company is a leader in innovation, offering the widest variety of design options when it comes to superior quality switchable privacy glass, self adhesive PDLC (Polymer-Dispersed Liquid Crystal) film, and photochromic self-tinting windows technology.

In the company's most recent news, Smart Glass Technologies is encouraging designers, contractors, and DIY'ers to utilize its PriWatt™ Smart Film when designing residential bathroom projects. This innovative technology, which is also referred to as electronically switchable film, provides an array of opportunities to control light, glare, and UV radiation – all while reducing electricity consumption. The PriWatt™ Smart Film is highly durable, easy to maintain, and offers privacy on demand with just the switch of a button.

“As individuals progressively seek innovation to help with more proficient answers for their necessities, we are seeing more interest for our Switchable Smart Film,” says founder of Smart Glass Technologies, William Turcan. “As one of the world's driving companies in the Smart Film industry, we are encouraging unique utilizations of our items, with a wide scope of alternatives open to residential use, making it simpler to utilize and more accessible.”

“For example,” Turcan continues, “one of our recent residential clients chose a range of ways to make her home in New York more comfortable, smart, and private by installing our PriWatt™ Smart Film in her bathroom and common living spaces. Our certified technicians were happy to install the smart film in a modern bathroom with a variety of switching methods to give the best privacy options, while being able to let in natural light. The smart film can be arranged in distinct ways so you can make it partially or fully opaque.”

According to the company, privacy is at the very heart of the PriWatt™ Smart Film technology – a result of its unique flexibility and diversity. With new developments and ideas occurring every day, there are unlimited options for utilizing this technology in any space of the home.

PriWatt™ Smart Film boasts a wide array of features, including:

- Accessible with affordable pricing
- Financial efficiency, due to energy savings
- Protection from UV radiation
- Creates a vibrant and uncluttered appearance
- Low dust and easy-to-clean
- Enhances privacy
- Remote controlled for ease of use
- And so much more!
