

Online Travel Market Growing at CAGR of 11.1% by 2022 with Top Investment Pocket

A comprehensive analysis of the current trends and future estimations in the global online travel market has been provided in this report.

PORTLAND, OREGON, UNITED STATES, December 7, 2020 /EINPresswire.com/

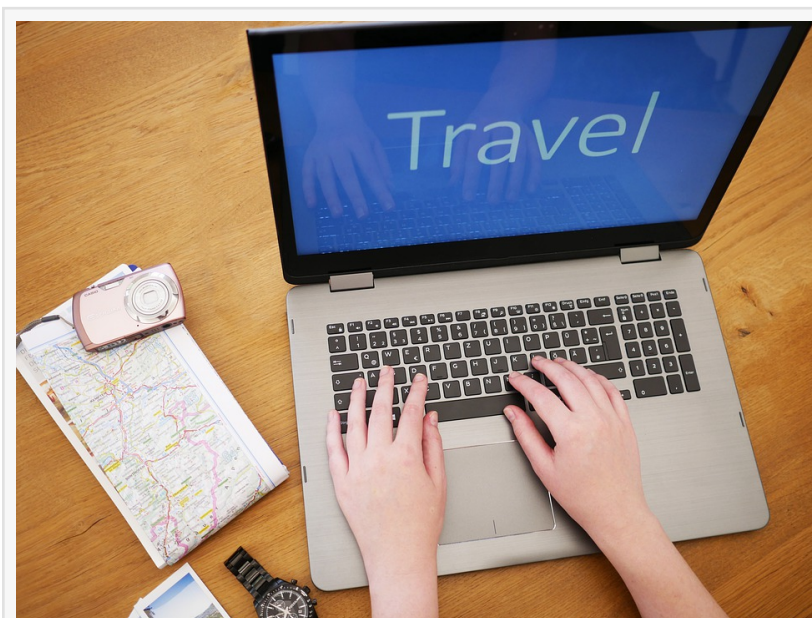

-- [Online Travel Market](#) Report, published by Allied Market Research, forecasts that the global market is expected to garner \$1,091 billion by 2022, registering a CAGR of 11.1% during the period 2016-2022. Asia-Pacific is expected to witness the highest growth during the forecast period. Direct travel suppliers, such as hotels, airlines and car rental

companies, which offer booking facilities on their websites, dominate the market, whereas Online Travel Agencies (OTAs) would witness higher growth over the next 5 – 6 years.

Growth of the online travel market is driven by the increase in internet penetration, rise in disposable income of people in emerging markets, and ease of comparing a variety of travel options online. Market players are introducing innovative travel and vacation package deals to assist travelers in making sound travel decisions as per their spending capability, such as affordable packages for international destination, discounts on car rentals and cash back on international flights.

Direct travel suppliers segment accounted for approximately 57% of the overall online travel market revenue in 2015. Though, the segment would continue to dominate the market over the analysis period, a gradual reduction in its market share is expected, owing to the growing popularity of online travel agencies (OTAs). OTAs are expanding their offerings at a rapid rate to attract travelers and increase their customer base.

Online Travel Market

Based on booking platforms, the market is segmented into mobile and desktop. Mobile platform attributes to two-sevenths of the market revenue and is anticipated to witness highest growth in coming years. This is attributed to increased penetration of smartphones and growing confidence of people in safety of mobile payments.

Transportation segment is projected to maintain its lead in the overall online travel services market, owing to rise in online flight bookings. Expansion in the number of low-cost carriers and growth in the number of connecting flights for tier I and II cities across the globe, drive the growth of flight bookings. In addition, online rail bookings witnessed a significant growth in the past few years. Expedia, a leading online travel agency, has announced its plans to launch a rail ticketing service in Europe by end of 2016, to mark its presence in the rail services within the transportation segment.

The online travel market is segmented on the basis of age group, wherein the travelers in the age group of 32 – 43 years, occupy a major portion of the market. However, from a growth perspective, the young travelers within the age group of 22-31 years, would witness the highest CAGR, due to extensive use of social media and smartphones for travel planning and bookings.

North America accounted for the majority revenue in 2015; however, Asia-Pacific is estimated to overtake North America in coming years to become the leading revenue-generating region. This is attributed to growing disposable income, growth in middle-class segment, increased penetration of Internet facilities, and increase in the number of youth population in emerging markets of Asia-Pacific.
