Global Electronic Health Records Market: Segments

Web-based EHR Segment to grow with the highest CAGR of % during 2019-30

Global Electronic Health Records Market is segmented by product into cloud-based software and

server-based/on-premise software. Web-based EHR systems segment accounted for the larger market share in 2019. With doctors & care facilities working on a comparatively smaller scale, these systems are more common as they can be built without in-house servers and still provide detailed customizations and enhancements depending on the requirements.

Global Electronic Health Records Market: Market Dynamics

Drivers

Government incentives and support

Governments of different nations promote health care organizations to implement EHR programs by offering incentives. Government financial incentives will continue to drive the EHR market during the forecast period.

Restraints

High operational costs associated with installation

The use and management of a clean space is a dynamic operation. Because of the rise in cyber-crime, market growth is limited by high EHR costs and growing concerns about patient data protection & protection.

Global Electronic Health Records Market: Regions

Global Electronic Health Records Market is segmented based on regional analysis into five major regions. These include North America, Latin America, Europe, APAC and MENA.

Global Electronic Health Records Market in North America held the largest market share of % in the year 2019. Factors such as accelerating adoption of healthcare information technology coupled with compliance of several regulations to increase the implementation of EHR in North American countries can be attributed to high revenue share. The Canada Action Plan offers EHR implementation funds, thus increasing the national acceptance of electronic medical records in primary care. Similarly, through Medicaid Transition Grants to states, the U.S. federal government has made attempts to direct and assist state-level healthcare information technology along with support for healthcare itself. The above variables would give the growth of the U.S. electronic health record industry lucrative potential in the near future.

Global Electronic Health Records Market: Recent Development

- In August 2019, Cerner Corporation announced about development of Cerner Learning Health Network along with Duke Clinical Research Institute. This innovation will assist in enhancement of clinical research registries as well as will expand the company's client base.
