RTE Foods refers to Ready-to-eat Foods.

Ready to eat meal products are often referred to as "convenience food", for the convenience they provide to the hectic life of people. They are readymade food or almost readymade food that just requires boiling. Depending on the process of production and packaging, they are segmented into canned food, frozen food and chilled food. And because the major drivers of the market aren't specific to any region but are globally influencing the market, hence ready to eat meal products market is fast growing uphill and has become the largest market in food industry globally.

Factors such as increasing population of working women, growing millennial population, busy work schedules, and on-the-go consumption habits are expected to fuel revenue growth of the global ready-to-eat food products market. Also, the increase in disposable income and consumer preferences for healthy and convenient food coupled with the rising demand for snacks and fried food products are expected to further boost the demand for ready-to-eat food products. Globally, the growth of organized retail has led to a widespread supply of ready-to-eat food products through a wide distribution network. These factors are expected to bolster the growth

of the global ready-to-eat food products market in the coming years. However, unhealthy substitutes and low quality and taste along with an increasing shift towards a healthier lifestyle is likely to hinder market growth in the coming years.
