The distribution of the demand as per the different types of goods has been included in the study.

Online Learning is a flexible instructional delivery system that encompasses any kind of learning that takes place via the Internet. Online learning gives educators an opportunity to reach students who may not be able to enroll in a traditional classroom course and supports students who need to work on their own schedule and at their own pace.

"Online education" has become a viable and exciting method for instructional delivery in the global business society that runs on a 24/7 schedule because it provides students with great flexibility. With the increased availability of the Internet and computer technology, students are able to access information anytime and anyplace that would normally be available only through a traditional classroom. Studies have shown that students learn just as effectively in an online classroom as they do in the traditional classroom. This report focuses on the global Online Tutoring Services status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Online Tutoring Services development in United States, Europe and China.
