## Description

Wiseguyreports.Com Adds “BCG Vaccine Market : Insights & Forecast with Potential Impact of COVID-19 (2020-2024) By Drug Type, End Use, Usage & Application” To Its Research Database

The global BCG vaccine market is anticipated to reach US\$65.53 million in 2024, growing at a CAGR of 4.70% during the period spanning 2020-2024. Growth in the global BCG vaccine market was driven by factors like increasing prevalence of tuberculosis, rising R&D funding on tuberculosis, growing incidences of bladder cancer, increasing prevalence of extensively drug resistant tuberculosis and surging BCG immunization coverage. The key trends that are expected to be faced by the market are declining targeted incidence rate of tuberculosis and decreasing targeted mortality of tuberculosis. The limited impact of BCG vaccine on adults is expected to impose a challenge on the global BCG vaccine market.

The global BCG vaccine market by drug type can be segmented as follows: immune BCG and therapy BCG. In 2019, the higher share of the market was held by immune BCG. The global BCG vaccine by end user can be segmented into the following pediatrics and adults. The dominant share of the market in 2019 was held by pediatrics. The market by usage can be divided into the following segments: tuberculosis and bladder cancer. The largest share of the market was obtained by tuberculosis in 2019. The global BCG vaccine market by application can be segmented as follows: hospitals and clinics, with hospitals holding a greater share of the market in 2019.

The global BCG vaccine market by region can be segmented into the following regions: North America, Europe and Asia Pacific. In 2019, the dominant share of the market was held by North America, followed by Europe and Asia Pacific. North America is predicted to dominate the market during the period spanning 2020-2024, supported by growing tobacco consumption and increasing technological advancements in BCG vaccination.

The competitive landscape of the market, along with the company profiles of leading players (Merck & Co., Sanofi, Statens Serum Institut, China National Biotec Group (CNBG), Serum Institute of India Pvt. Ltd., Green Signal Bio Pharma Ltd) are also presented in detail.
