The Countdown has Begun - ProBit Exchange Lists (WLOG) Trading: December 29, 2020 at 16:00 KST

NAMDAEMUN, SEOUL, SOUTH KOREA,
December 24, 2020 /

EINPresswire.com/ -- [Global Exchange Probit](#) has announced this morning the listing date and timing for this new kid on the block (WLOG) which embarks to make a strong statement in the crypto world not just to their investors but to the industry on the whole. Crypto and blockchain continue to make major strides across global industries but much like other breakthrough technologies or innovations.

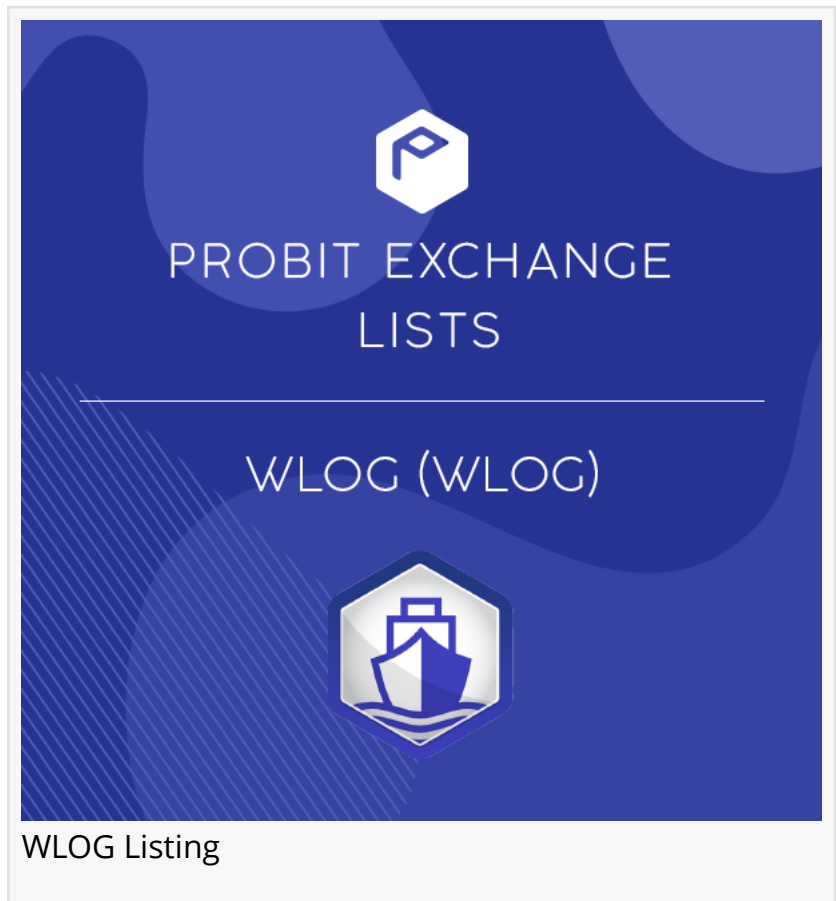

This listing proves our commitment to all our trusted investors, partners and stakeholders who have patiently braved the pandemic along with us and now it is time to reap the fruits of our labour said Chairman Keun-Young Kim

3,000,000 monthly web visitors

50,000,000 users on partnering aggregators and wallets such as CoinMarketCap

User interface of Multilingual website supporting 41 different languages

Marketing and community support in 8 key languages

ABOUT WLOG

Managing today's supply chains—all the links to creating and distributing goods—is extraordinarily complex. Depending on the product, the supply chain can span over hundreds of stages, multiple geographical (international) locations, a multitude of invoices and payments, have several individuals and entities involved, and extend over months of time. Due to the complexity and lack of transparency of our current supply chains, there is interest in how block-chains might transform the supply chain and logistics industry.

[The WTIA Logistics Solution](#) – the WLOG Platform provides a simpler, better solution that is secure, transparent and resolves many of the bottlenecks that plague the current logistics industry.

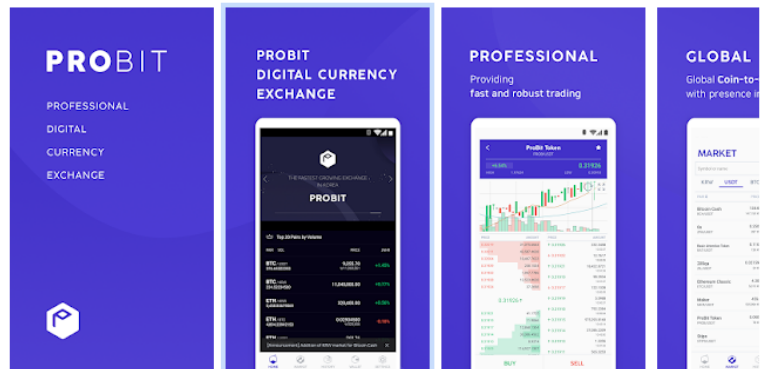

On the WLOG Platform, whenever a Buyer makes an order with a Seller, a smart contract based on the agreed conditions are made on the WTIA Blockchain. The Buyer then purchases WLOG Tokens for the settlement of the trade order and the WLOG Tokens are locked in the wallet until the completion of the trade. Once the required amount of WLOG tokens are locked in the wallet, the order is given to begin production with the manufacturer and the purchase order is recorded in the WTIA blockchain. Once the products are manufactured, they are shipped to the terminal or port and external inspectors perform quality and origin verification. The external inspectors will verify the origin and quality on the blockchain and it is recorded. After that, the product is loaded on the ship and external inspectors verify quantity and loading and record it on the blockchain. The product is then shipped to the buyer and verified by a Bill of Lading or GPS Certification. The WLOG tokens are then released to the seller automatically or manually by the buyer depending on the conditions of the contract.

The WLOG Platform is the first application of the [WTIA Network](#), connecting sovereign projects with real-world business applications.
