Many people choose to ride motorcycles for a number of reasons. It may be because you like the feeling of freedom that they provide, you may like the fact that the gas mileage is better or you may just prefer them to any other method of transportation. Whatever the reason for riding motorcycles, the downfall is the fact that drivers of other vehicles are not always conscious of them. Driver negligence is among the leading causes of all motorcycle accidents. Motorcycles

operate by different rules than other drivers do. When drivers aren't paying careful attention, they often get involved in accidents that cause motorcyclists harm.

Whether because of a blind spot or simply because of failing to look for drivers before turning or changing lanes, motorcyclists are often injured by driver negligence. Drivers must be alert and aware of the surrounding environment at all times, which means being on the lookout for motorcycles.
