Summary:

"Online Freight Platform - Market Demand, Growth, Opportunities, Manufacturers and Analysis of Top Key Players to 2024" To Its Research Database.

Overview

The advent of the recent developments in the field of technologies such as Big Data and analytics, cloud platforms, and artificial intelligence, among others, has given rise to new marketplaces within the logistics market, including, online freight services. Providers of online freight services, including both traditional logistics service providers (LSPs) and logistics start-ups, leverage digital technologies to visualize, identify, track, and address the inefficiencies in the logistics value chain by offering Web or app-based innovative solutions. Logistics start-ups offer innovative service offerings in freight transportation, warehousing, distribution, and delivery services relating to e-Commerce fulfillment, last-mile delivery, freight and supply chain solutions, and warehouse aggregation. Anticipating potential disruptions in the market, the leading traditional LSPs are increasingly focusing on the development of innovative online service offerings with the support of in-house technology tools and human resources. With the influx of a large number of new entrants, the focus will gradually shift to service differentiation to deliver deeper insights, wider data capture across the value chain, and faster services at cheaper prices.

In the context of China-US trade war and global economic volatility and uncertainty, it will have a big influence on this market. Online Freight Platform Report by Material, Application, and Geography – Global Forecast to 2023 is a professional and comprehensive research report on

the world's major regional market conditions, focusing on the main regions (North America, Europe and Asia-Pacific) and the main countries (United States, Germany, United Kingdom, Japan, South Korea and China).
