

Charging Your Car Battery is an Easy Way to Save Money & Reduce Car Trouble Woes

When your car battery is charged, you have the peace of mind of knowing you can rely on your vehicle to start and take you wherever life leads in 2021.

CHICAGO, IL, UNITED STATES,
December 30, 2020 /

EINPresswire.com/ -- The most popular New Year's resolutions include saving money, managing stress, and living life to the fullest. CTEK knows regularly charging your car battery is a simple way to ensure you do all three.

In today's world, plugging in a smartphone to recharge the battery is second nature, but did you know you can do the same with your car battery?

Dead or flat batteries have always been a top cause of car troubles, but reports from AAA say there's been a dramatic increase in the number of dead vehicle batteries in 2020.

Dead or flat batteries have always been a top cause of car troubles, but reports from AAA say there's been a dramatic increase in the number of dead vehicle batteries in 2020.

"This year, we saw a change in driving habits due to COVID-19. People traveled less and stayed at home more. Daily commutes were eliminated as companies switched to work-from-home policies," explained Bobbie DuMelle, executive vice president of CTEK North America. "As a result, cars remained parked in driveways or garages for long periods of time, draining down their batteries."

Regularly charging your car battery can extend its lifespan by as much as three times, saving you money, hassle, and the stress of dealing with a dead battery.

The average cost of a new lead-acid car battery runs between \$125 to \$200, and that's just for the battery itself. Labor fees to have the battery replaced at a workshop or dealership will add to

the price tag

When your car battery is charged, you have the peace of mind of knowing you can rely on your vehicle to start and take you wherever life leads in 2021.

For more than 30 years, CTEK has been a leading global brand in the care and maintenance of vehicle batteries, and CTEK's high-quality, reliable chargers are effective, easy to use, and safe for the battery and the user.

CTEK sells more than 1 million battery chargers each year across the globe. CTEK's line of battery chargers means they have the right charger to meet your needs, including the popular [MXS 5.0](#) battery charger which works with all 12v lead-acid batteries.

CTEK's smart pulse technology means you can leave the charger attached to your battery for long periods of time without worrying about the battery overcharging.

When your battery is charged, you have peace of mind knowing you can rely on your vehicle to start and take you wherever life leads in 2021.

"New Year's resolutions are all about improving our lives. Charging your car battery is a simple way to make a big impact," said DuMelle. "Plus it's easy to do. With a CTEK charger, you don't need extensive automotive or battery knowledge to charge a car battery."

CTEK battery chargers and accessories are available on [Amazon.com](#) or at [smartercharger.com](#).

ABOUT CTEK, INC.

In today's world, plugging in a smartphone to recharge the battery is second nature, but did you know you can do the same with your car battery? Regularly charging your car battery can extend its lifespan by as much as three times, saving you money, hass
