

Honey Market by Type and Application -Global Opportunity Analysis and Industry Forecast, 2020-2027

PORTLAND, OR, UNITED STATES, December 31, 2020 / EINPresswire.com/ -- Honey is a viscous and sweet food substance produced by bees and some related insects. Bees produce honey form the sugary secretions of plants and store it in honeycomb, whereas other insects produce it by regurgitation and enzymatic activity. It is suitable for long-term storage, owing to its unique composition and chemical properties. It is widely used owing to its antimicrobial properties, promoting debridement, and it speeds up the

Honey Market

healing process by stimulating wound tissues.

Increase in use of honey as healthy alternative for artificial sweetener, energy source, immunity system builder, and as a weight loss source is the major driver of the global honey market. Furthermore, increase in demand for honey in cosmetics and medicines is expected to provide substantial growth opportunity for the market. However, excessive consumption of honey has several potential adverse effects that reduce its consumption, which in turn hinders the market growth.
