

Functional Proteins Market by Source, Type, Structure, Form, and Application and Industry Forecast, 2020-2027

PORTLAND, OR, UNITED STATES,
December 31, 2020 /

EINPresswire.com/ -- [Functional proteins](#) are biochemical compounds comprising polypeptides that carry out biological activities. For instance, the immunoglobulins present in colostrum has a positive impact on the immune system of animals. These proteins have several benefits such as improve health, mitigate the effect of pathogens, and reduce recovery time after intestinal disorder.

Functional proteins Market

The global functional proteins market is driven by rise in demand for animal-derived proteins in sports and fitness nutrition and development of various protein ingredients such as concentrates and isolates for applications in the food industry. However, high cost involved in R&D activities and stringent laws by regulatory bodies hamper the market growth. Furthermore, recent advancements in protein powder manufacturing to promote health benefits such as muscle gain and fat loss present lucrative opportunities for the market players during the forecast period.

The global functional proteins market is segmented based on source, type, structure, form, application, and geography. Based on source, it is divided into plant (beans and soya), and animal (eggs, dairy, poultry, and beef). On the basis of type, it is classified into hydrolysates (hydrolyzed animal protein and hydrolyzed vegetable protein), whey-based (isolate and concentrate), casein & caseinate, and soy-based (isolate and concentrate). Based on structure, it is segmented into primary, secondary, tertiary, and quaternary. On the basis of form, it is segmented into liquid and powder. On the basis of application, it is classified as functional food & beverages, dietary supplements, and animal nutrition. Geographically, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The key market players profiled in this report are Kerry Group plc. (Ireland), Glanbia Plc (The Netherlands), Arla Foods a.m.b.a (Denmark), and Fonterra Co-Operative Group Limited (New Zealand, Koninklijke DSM N.V. (The Netherlands), Archer Daniel Midland Company (U.S.), and FrieslandCampina (The Netherlands).

Key Benefits

This report provides a quantitative analysis of the current trends, estimations, and dynamics of the global functional proteins market for the period of 2016-2023 to identify the prevailing market opportunities.

The key countries in each region has been mapped based on market share.

In-depth analysis of the market segmentation assists in determining the prevailing market opportunities.

About Allied Market Research:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting services to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
