Owing to the outspread of Covid 19, the demand for functional beverages as a result of growing consumer spending and health consciousness has experienced substantial growth. COVID-19 is expected to further boost the demand for a2 milk at a much higher rate in the global market. An increase in awareness amongst people to strengthen their immunity & immune system to prevent themselves from being infected easily is compelling them to maintain a healthy lifestyle and proper diet.

On the basis of form, the liquid a2 milk category accounted for the maximum share in the global a2 milk market in 2019. Liquid a2 milk is most owing to its high rate of consumption and

convenience. Consumers prefer fresh milk for direct consumption since it offers important nutrients required by humans, including proteins, calcium and vitamins. However, the powder a2 milk segment is expected to grow at a higher CAGR during the forecast period.

On the basis of packaging form, the carton segment accounted for the maximum share in the global a2 milk market in 2019. Cartons enable to provide a longer shelf life to the product, incur lower transport costs and are also convenient and safer to use for consumers. Thus, owing to this growing preference and propelling consumption, the carton segment accounted for a higher value share in the global a2 milk market size and is anticipated to retain its position during the forecast period.
