By type, the gas and liquid segment garnered the largest share in the filtration & separation market in 2018. In addition, the expansion of HVAC and chemical industry throughout the globe especially in nations such as the U.S., China, and India, fuels the demand for filtration & separation. The manufacturers of filtration & separation are focusing on business expansion and new projects as a strategy to increase their filtration & separation market shares. For instance, in October 2018, Donaldson Company, Inc. announced the acquisition of BOFA International Ltd., which sells fume extraction technology systems to various industries. The acquisition was meant to be completed by the end of first quarter of 2019..

Currently, by end-user, the water and [wastewater segment](#) have garnered significant market share in 2018, owing to government regulations such as Clean Water Act (CWA) to control water pollution. In addition, based on type, the air segment is expected to exhibit significant growth during the forecast period. In terms of region, North America, and Asia-Pacific collectively contributed around 69.8% of shares in the global filtration & separation market in 2018.

Key Players:

The key market players profiled in the filtration & separation market report include Ahlstrom-Munksjö, Alfa Laval, Donaldson, Eaton, Freudenberg, Lydall, Inc., Mann+Hummel, Pall Corporation, Parker Hannifin Corporation, and Porvair Plc. The major players operating in the global filtration & separation market have adopted key strategies such as acquisitions, product launch and business expansion, to strengthen their market outreach and sustain the stiff competition in the filtration & separation market. For instance, in November 2017, Ahlstrom-Munksjö Oyj launched Trinitex Advance W3000 filtration media, specifically designed for pulse jet gas turbine applications. The product offers particulate air (EPA) efficiency that provides better protection to the gas turbines.
