Increase in population and rise in disposable income of consumers has increased the purchasing power of the consumers, and thus encourage them to spend more on products which provide convenience and comfort to them. Consumers are more fascinated toward the new and advanced technology that launches in the market as it gives the experience of superiority of using the technology before everyone else does. Smart bread machine comes with many advanced features that minimizes the human efforts and saves time, catching health, and hygiene conscious consumer's attention. The growth of the market is highly driven by the commercial sector as there is a high demand for this product by cafes, restaurants, food parks, and hotels for the large production of breads, cakes, pizzas, and many more food recipes.

New product launches to flourish the market:

New products that contain improved capabilities have been launched by leading market players. They have taken necessary steps to improve accuracy of devices and overall functionality as well. Wilkinson Baking Company has launched a new automated bread machine, which can make up to approximately 235 loaves of bread per day. Sana smart bread maker is also a very popular product in the market comes with multi-functions such as it has fully adjustable programs, programmable technology, unique stainless steel bread pan and kneaders with automatic batch processing and it can make variety of dishes.

COVID-19 Scenario Analysis:

Corona virus has spread all over the world and most of the countries are adopting lockdown measures to control the spread of the virus and securing public health. The impact of corona can be seen so stark in everything from our dining tables to the economy, business and what not. All business and production activities are fully shut down except the necessary one such as food and medical sector or others, leading towards economic crisis in the country. Manufacturing and production functions are stopped which has slowed down the business and inactive trade and transportation has fully disrupted the supply chain because of which companies can face big losses in near future.
