

SatellitePhoneStore.com Recognized for Largest Inventory of Satellite Phones and Internet Terminals in The USA

Satellite Phone Store continues to dominate the industry with new innovative products, 4 retail locations, and dynamite service.

SARASOTA, FLORIDA, USA, January 7, 2021 /EINPresswire.com/ -- People who are most concerned about the border and hassle-free telephonic communication realize that Satellite Phone Technology is a lot more sophisticated than Cellular Technology and more secure. Imagine being able to make and receive phone calls from all the places that cell phones are dead. Great for first responders where the cellular grid may be down for weeks at a time. Satellites are not affected by hurricanes or snowstorms.

If you need a satellite phone for more than 1 month of the year or multiple times a year, it is recommended to buy a satellite phone instead of renting. If you only need a satellite phone for one or two weeks at a time, Renting a satellite phone would be a better option.

The [Satellite Phone Store](#) Compares The Top 3 Best Satellite Phones in 2020:

Inmarsat IsatPhone 2 Satellite Phone:

The essential services - Satellite telephony, voicemail text and email messaging, GPS location data

The longest battery life - Up to 8 hours talk time and up to 160 hours standby time

The most robust handset - Operates at -20°C to +55°C; dust, splash, and shock-resistant (IP65).

Humidity tolerance from 0 to 95 percent

The only satellite phone to support Bluetooth - Place the handset on its side, with full maneuverability of the antenna, for easy hands-free use

Easy to use - Intuitive cellular phone style interface - High-visibility color screen. Larger keypad for easy dialing with gloves on

Reliable network connection - Operates over global geostationary satellites that will be operational into the 2020s. Significantly less possibility of call dropping

The ultimate value - Highly competitive handset, accessories, and airtime pricing

- Mini-USB data port
- 21 supported menu languages

What has once considered specialized gear for the military and secret agents is now available to everyone. Over the past several years, satellite phones have quietly made giant leaps in accessibility and affordability. During a recent press event, a company spokesperson made these comments, "We pride ourselves on offering a full-service solution. We understand this technology can be intimidating for first-timers and those who have not purchased a new satellite phone in years. SPS welcomes the opportunity to explain the difference between GEO and LEO satellite technologies, and which will offer better coverage, voice quality, and data speed to suit your needs."

He goes on to say, "As industry experts, we know which companies are planning to shoot more satellites into space and which are building more ground stations. We hope the information below helps narrow your decision and invite you to stop by one of our stores so we can answer any questions you have in person. After all, nobody understands the importance of good communication when you feel lost in the middle of nowhere better than us."
